### NEWS NOTES.

A heavy snowstorm is reported at Calgary.

Bowmanville ratepayers carried a by-law providing for municipal ownership of the electric light plant.

Until the existing conditions are considerably improved, there will be no change in the dog muzzling regulations.

Bee Supplies, Section Foundation, Snokers, full line in stock, at

BOYLE & SON'S.

James Reynolds, Port Hope, has completed arrangements for his walk to Toronto and return on June 20th.

Winnipeg's assessment is \$158,000,000 this year, an increase of \$50,000,000. Land is assessed at its full selling value.

John Egeter received a fatal shock while working on the Ontario power transmission line near Niagara Falls. The power was supposed to be turned off.

At Pittsburg, Tuesday, was the coldest May 31st in the annals of the office of the United States weather bureau. A temperature of thirty-nine degrees was recorded.

Justice Landot, in Montreal, ruled that a mother had a right to thrash her daughter's suitor if the latter persisted in his attentions contrary to the parent's wishes.

The annual report of the Montreal Light, Heat and Power company show gross revenue for the year of \$4,240,945 and net revenue of \$2,302,067. Surplus was \$721,200.

Mrs. L. D. Kennedy, (formerly Edna Roblin,) formerly of Belleville, died at her home in Minneapolis, Minnesota, on Saturday morning, in an hospital after a short illness.

By-laws were carried by Peterboro ratepayers to give the William Hamilton Company a fixed assessment for ten years, and to sanction an expenditure of \$30,000 for sewers.

A discharged United States soldier became insane on a train and leaped through the window near St. Thomas. Although the train was running forty miles an hour he escaped almost unhurt.

Alfred Bellerose, a man of 75 years was shot in the head by a highwayman, at Montreal, and probably fatally wounded. The police locked him up all night on the charge of drunkenness.

On May 25th, at the home of the bride's parents, Mr. and Mrs. G. W. Embury, Tyendinaga, their eldest daughter, Miss Bethilda Embury, was united in marriage to Herbert Tinney, Campbellford.

A special to the Detroit News from Calumet says that Lake Superior and the surrounding country are in the grip of a fierce blizzard, with high north-east winds and a heavy snow. All boats are seeking ports.

A traction engine owned by Mr. Wm. Seely broke through the county bridge over Hog Lake in Madoc township, and is now at the bottom, out of sight. Mr. Seely went down with the engine, but was rescued.

Rather than run into a group of school girls on the street crossing, Frank McManus, St. John, N. B., driving of a delivery team, drove into a rapidly moving touring car, sustaining serious injuries, that may cripple him for life.

Sheriff Bogart, Watertown, N. Y., told the baseball players of that city

### WALNUT GROVE.

There are good prospects of full crops as there has been a rapid growth for some days.

Mrs. John Macpherson spent the 24th with her daughter, Mrs. J. Sharpe. Quite a number from here celebrated the 24th at Floating Bridge.

Azel Buck has returned home after spending a few days with his daughter, Mrs. H. Babcock, Odessa.

Mr. and Mrs. Doney Thompson, of South Bay, are renewing acquaintances here.

### FAIR VIEW.

The farmers are rejoicing over their hay crop; there are prospects of a good yield. The apple crop looks well at this season.

W. H. Cadman is building a house to accommodate a hundred and fifty fowls.

Miss Maggie Lowry, sick for eight months is gaining.

James Madden sold a valuable horse for a handsome sum.

Miss Jennie Bartley spent 24th in Kingston.

Mrs. Miller, Rochester, N. Y., is visiting her sister, Mrs. S. Vanalstine. Elmer Miller is building an addition to his house.

### MAHYSVILLE.

Messrs. Thomas Meagher, William Daley and Joseph Foltes, of Rochester, visited John Meagher on Sunday and called on other friends.

Mrs. Walter Smith, of Toronto, spent last week with her parents, Mr. and Mrs. John Toppings.

John Barnhart is erecting a commodious wood house and kitchen for John C. Meagher.

All are pleased to hear that Miss Mary Dacey is improving in the Hotel Dieu, Kingston.

Charles Meagher, of Napanee, and Miss Kathleen Hart, of Deseronto, called on friends on Sunday afternoon.

### CENTREVILLE.

Farmers have finished sowing and are now planting.

Noble McGill's untimely death from tuberculosis was a shock to the neighborhood. His father and mother, of Elhart, Man., arrived before his death.

Miss Stella Ingoldsby has resumed her studies at the Newburgh high school, having been home for some time with measles.

Mr. Vannest's raising bee was well attended.

Mortimer Lockhead is erecting a spacious barn, which will be a credit to the vicinity.

Mr. and Mrs. Charles Ingoldsby spent the 24th in Kingston.

Mrs. Harper Reid and uncle, Peter Rombough, are visiting in Kingston and Joseph Barrett in Toronto.

### ELECTION OF OFFICERS.

At the regular meeting of Napanee Lodge, No. 86, I.O.O.F. held on Tuesday evening the following officers were elected for the ensuing term:

E. Bell, N. G.  
F. Dean, V. G.  
G. Chapman, R. S.  
E. McLaughlin, F. S.  
G. B. Joy, Treas.

Messrs. G. F. Rutland and S. Vanalstine were elected as representatives to Grand Lodge which meets in Toronto this year.

Messrs. Fred J. Vanalstine, Robert Dickinson and S. Vanalstine were elected representatives to District Lodge, which meets in Brighton on

peals against the Assessment Roll of 1910.  
All persons interested are required to at-  
tend.

ABRAM WINTERS,  
Tp. Clerk.

Selby, May 17th, 1910.

## NOTICE.

The Court of Revision for the Municipality of Sheffield will be held in the Town Hall, Tamworth, on MONDAY, JUNE 6th, 1910, at the hour of 10 o'clock a. m., for the purpose of hearing appeals against the Assessment Roll for 1910. All parties concerned will govern themselves accordingly.

JAS. AYLWORTH,  
Township Clerk.

Dated at Tamworth this 17th day of May.

## NOTICE OF MEETING.

## EXECUTORS' NOTICE TO CREDITORS.

In the estate of Charles Robinson Vanslyck, deceased.

Notice is hereby given pursuant to Chapter 129, of the Revised Statutes of Ontario, Section 38, and amending acts, that all persons having any claims or demands against the estate of Charles Robinson Vanslyck, late of the Town of Napanee, in the County of Lennox and Addington, deceased, who died on or about the 8th day of October, A. D. 1908, are required to deliver or send by post prepaid to Herrington, Warner & Grange, Napanee, Ontario, Solicitors for Martin T. Vanslyck and Edna M. Vanslyck, Executors of the last will and testament of the said Charles Robinson Vanslyck, deceased, on or before the 7th DAY OF JUNE, A. D. 1910, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 7th day of June, A. D. 1910, the said Executors will proceed to distribute the assets of the said estate amongst the parties entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets, or any part thereof, to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

HERRINGTON, WARNER & GRANGE.

Solicitor for the said Executors.

Dated this 7th day of May, 1910.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender in addition to the Eastern Departmental Building, Ottawa," will be received at this office until 5:00 P.M., on Tuesday, June 14, 1910, for the construction of an addition to the Eastern Departmental Building, Ottawa.

Plans, specifications and form of contract can be seen and forms of tender obtained at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

NAPOLEON TESSIER,

Secretary.

Department of Public Works.  
Ottawa, May 18, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

**A MIS-HIT**

Did you make a mis-hit the time you employed the last "help."

Don't worry. There are lots of good fish in the sea, and a sure bait to catch them is a Want Ad.

Lax-ets 5 C Sweet to Eat  
A Candy Novel Luncheon.

Rather than run into a group of school girls on the street crossing, Frank McManus, St. John, N. B., driving of a delivery team, drove into a rapidly moving touring car, sustaining serious injuries, that may cripple him for life.

Sheriff Bogart, Watertown, N. Y., told the baseball players of that city and Cape Vincent that if they attempted to play on Sunday last he would fill the jail with offenders. This gave the players such a jolt that the game was called.

W. H. Bull, Hillier, got off a C. O. R. train at Wellington. It started and he tried to get on, but missing his footing he fell under the train and the wheels passed over his arm, crushing it so badly that it had to be taken off at the shoulder. Mr. Bull died of the injuries sustained, the following day.

The opening gun of a local option campaign in Belleville was fired Sunday, when many speakers sent out by the Dominion Alliance filled nearly all the local Protestant pulpits, their theme being temperance. In the afternoon a mass meeting was held in the Opera House, at which rousing speeches were made by Mr. Joseph Gibson, President of the Dominion Alliance, and Mr. James Simpson, Chairman of the Toronto Board of Education.

Immigration for April reached record proportions, totalling about one-quarter of last year's whole immigration. The final returns are not yet in, but the total is estimated at about 50,000, of whom nearly one-half were American settlers coming into the Canadian west. Immigration for the month is about double that of April of last year. For May the total immigration considerably exceeded the previous May's record. The Immigration Department reports that the total in quality and quantity of this year's immigration far exceeds any previous year in the history of the Dominion.

## Artists Supplies.

The latest and best in water and oil colors, brushes, academy boards, drawing paper, stencil patterns and etc. at The Medical Hall, Napanee's Largest Drug Store—Fred L. Hooper.

Los Angeles, May 20.—An echo of the sensational failure of the United States Banking Company of the city of Mexico was heard in the United States District Court here yesterday. Attorney Lucien Gray, counsel for the receiver of the bank, filed a petition asking to have George Ham, former head of the involved bank, declared bankrupt.

A citation was issued for Ham's appearance before Judge Wellborn on June 17, but as he is now held in a Mexican prison on a charge of "breach of confidence," a criminal offence under the Mexican law, it is not probable that Ham will appear. But, after due publication in the papers, the bankruptcy proceedings can go ahead just as though the alleged bankrupt were here.

It is set forth in the application that Ham made an assignment on February 2 to T. S. C. Saunders of the city of Mexico for the benefit of creditors, and in so doing committed an act of insolvency.

It is understood that one creditor has tried to get sole possession of some of Ham's property in this section. The banker is known to have a valuable walnut grove near Whittier, beside other holdings, the value of which is problematical.

Even though Ham should be declared a bankrupt in this federal district, it would have no bearings on his standing in Mexico, attorneys say Ham was President of the United States Banking Company. It failed about February 1, for approximately \$8,000,000 gold, after standing a tremendous run for days. Its head was considered a remarkable financier.

We have the gas stove you want. The gasoline stove that is safe, and the oil stove that is guaranteed to be perfect.

BOYLE & SON,

E. McLaughlin, F. S. G. B. Joy, Treas.  
Messrs. G. F. Rutland and S. Vanalstine were elected as representatives to Grand Lodge which meets in Toronto this year.  
Messrs. Fred J. Vanalstine, Robert Dickinson and S. Vanalstine were elected representatives to District Lodge, which meets in Brighton on Wednesday next.

ARGYLL LODGE No. 212.

Election was held on Thursday evening in Argyll Lodge 212, when the following officers were elected:

Jas. Roblin, N. G.  
M. P. Graham, V. G.  
G. T. Walters, R. S.  
F. S. Scott, Fin. Sec.  
F. H. Carson, Treas.  
Representatives to Grand Lodge, B. M. Black, Arthur Caton.

Mr. and Mrs. D. L. Amey returned home on Monday from visiting friends at Empey Hill, Selby and Napanee. Great numbers have been out nights recently, not star gazing, but comet gazing.

Visitors: Mrs. Thompson and Mrs. Bradshaw, Northbrook, at B. Revell's; Mrs. E. M. Yorke and Mrs. H. Reynolds, Verona, at J. Pomeroy's.

WILTON.

Bernard Mills received a telegram acquainting him with the sad tidings of the death of his father-in-law, Rev. J. Teasdale, London. Mr. Teasdale has spent several summers in our vil-

SHALL LENNOX & ADDINGTON  
HAVE A HOSPITAL?

We find a very general disposition, among the citizens and people of the county, to support the Hospital movement. One of the best indications is a spirit of caution, expressed by some that a hospital would be a burden upon the town and county.

Mr. Detlor in his proposal, stipulates that his bequest is conditional upon a guaranteed maintenance. After thorough investigation he concludes that there should be an endowment fund sufficient to produce from \$2500.00 to \$3000.00 yearly. This added to the Provincial and Municipal grants, and receipts from pay patients, would place the institution in a very desirable position.

Dr. R. W. Bruce Smith in a letter says, "Not many of the hospitals in this Province have an endowment sufficient to carry the expenditure from year to year. They depend altogether upon Municipal grants, the Government grant of 20c per day and what is received from paying patients, the balance being made up by local contribution."

The following letter from the Inspector will answer several inquiries we have received:

Toronto, May 31st, 1910.

Dear Doctor,—I have a letter of May 27th, and in reply beg to state that in organizing for a hospital it is better to have a Trust Board formed and incorporated under the Companies' Act, which any lawyer will be able to explain to you. It is better to have a Board of about seven or nine members. For example, the Town Council might be represented by the Mayor and one appointment, the County Council by the Warden and one member appointed, the balance being made up of independent citizens chosen in any way that may seem best to meet local conditions.

Perhaps, some time after you get the hospital spirit thoroughly aroused, you might arrange for a public meeting and, if convenient, I would arrange to attend and give you any information or assistance in my power towards getting a hospital established at Napanee. I have the honour to remain,

Your obedient servant,

R. W. BRUCE SMITH  
Inspector.

Dr. G. C. T. Ward  
Napanee, Ont.

## A PAIR OF GLOVES.

The Impudent Store People Wouldn't Take Them Back.

Mrs. Pinkerton's first question was about the gloves.

"Did you exchange them?" she asked.

"No," said Pinkerton, "I didn't."

"There," she complained, "I might have known you would forget it. How careless! I told you the very last thing before you left the house to be sure to attend to it. Really, I don't see how men can be so thoughtless."

"I didn't forget," said Pinkerton. "I tried to change them, but they wouldn't take the things back."

"Wouldn't take them—back?" she said. "Why not?"

"They said they were soiled."

## NEW LUMBER YARD

Messrs. J. R. Dafeo and W. T. Waller, have purchased the lumber stock and business of Mr. M. S. Madole, and have overhauled the machinery of the planing mill and have it equipped for first-class work, and are prepared to supply the following first-class building material:—

Mrs. E. M. Yorke and Mrs. H. Reynolds, Verona, at J. Pomeroy's.

#### WILTON.

Bernard Mills received a telegram acquainting him with the sad tidings of the death of his father-in-law, Rev. J. Teasdale, London. Mr. Teasdale has spent several summers in our village and has endeared himself to all. Sincerest sympathy is felt for the sorrowing widow and daughters. Besides Mrs. Mills there are two other daughters, Mrs. J. Letteney, London, with whom deceased resided, and Mrs. Rev. D. Flemming, Dauphin, Man., who is well known here.

There will be no service next Sunday evening in the Presbyterian church, as Rev. J. P. MacInnes will attend the general assembly at Halifax.

Mrs. Baxter Redden, Florida, is worse again.

Mrs. C. Ward, Colebrooke, and Mrs. C. A. Baker, Moscow, spent a couple of days last week with Mrs. W. H. Neilson and Mrs. W. Forsyth.

Mr. and Mrs. S. Storms were visiting her parents, Mr. and Mrs. W. Babcock, Colebrooke, on Sunday. 8

#### CAMDEN EAST.

May went out cold and cloudy all day.

Quite a large number saw the comet last Saturday evening which was very plain in the western sky at 9.30 p.m.

The many friends of T. N. Stover are pleased to hear that he is improving under the skillful treatment of Dr. Yourex from his accident last week.

Miss Dickson is ill with Dr. Beeman, Newburgh, in attendance.

Miss Janet O'Hara, trained nurse, is attending Miss Emma McCarthy, Bicknell's Co., who has had a relapse of measles.

Mr. and Mrs. McDonald, Bicknell's Co., were called to Tamworth last week to attend the funeral of their sister-in-law, Mrs. James McDonald.

Wm. Hannah has recovered from a severe attack of measles and all are pleased to see him in the village again.

Jno. McLean had a narrow escape while walking along the bank of the river at a steep place he slipped into the river, but reached shore safely with slight injuries and a wet jacket.

Mrs. T. Hartman has returned home after spending several days in Odessa with her sisters and other relatives.

Mrs. D. B. Parrott and daughter Bertie, are spending a few days at Newburgh with her brother, Wm. Nugent and other relatives.

Mrs. Judge, senior, has gone to Moscow to take care of her daughter, Mrs. Benn, who has a serious attack of measles.

Mrs. Huffman, Moscow, was at her daughter's Mrs. Judge, Jr., last week.

Mrs. Hamilton, Enterprise, was visiting her son in the village, Sam Hamilton, a few days.

Mrs. Blewett, Napanee, spent last week with her friend, Mrs. John S. Galbraith, Bethel Street.

Mrs. Carroll and son Harold, have returned home from Yarker, where they spent the last two weeks with her sons.

Jim Bicknell, also Stanley Huff, who both have situations on the boats at Kingston, the Casplan and Kingston, left last week to fill their places for season.

Mr. Water Brown, Wilton, late of Albert College, Belleville, will supply the pulpit in the Methodist Church next Sunday evening at 7.30 o'clock.

Mr. and Mrs. W. Nugent and family, of Switzerville, visited his aunt, Mrs. B. D. Parrott, Sunday last.

#### Kitchen and Porch Floors.

There are just three things that you think about when you look at a dull, worn floor. 1st For Kitchen floors—Use Prism Floor Enamel, (it has the varnish gloss and is easily cleaned); 2nd For Porch Floors—Use Sherwin-Williams Porch Floor paint, (especially prepared for "outside" floors, made to stand the weather); 3rd For Hardwood Floors—Whether in oil, a varnish or wax finish we can give you the very best thing. The Medical Hall, Napanee's Largest Drug Store—Fred L. Hooper, sole agent for Napanee.

to attend it. Really, I don't see how men can be so thoughtless."

"I didn't forget," said Pinkerton. "I tried to change them, but they wouldn't take the things back."

"Wouldn't—take—them—back?" she said. "Why not?"

"They said they were soiled."

"Soiled? Well, of all things! If they are they got soiled in their own store. I didn't soil them. I have never had them on my hands. I couldn't get them on. They were half a size too small. They gave me the wrong number. Why didn't you tell them so?"

"I did."

"Whom did you tell?"

"The clerk and the floorwalker and everybody who would listen to me."

"And what did they say?"

"They laughed."

"The impudent creatures! I'll never buy a cent's worth in that store again, you see if I do."

"That's just what I said," Pinkerton put in. "I said you never would."

"And what did they say to that?"

"They laughed again."

"Well, that settles it. I never will buy anything there now. Where are the gloves?"

"In my pocket."

"Let me have them, please: Soiled, indeed! I'll see if they are."

Mrs. Pinkerton unwrapped the package. As she took out the gloves she blushed slightly.

"Well," she said.

"Well?" echoed Pinkerton. "What's wrong?"

"N-nothing much," she said, "only this is an old pair of gloves. I cleaned them last week with gasoline. I made a mistake and sent them back instead of the pair I bought yesterday."—New York Herald.

#### HOW THE DEAF ARE MADE TO HEAR.

M. D. Tugendhaft, the celebrated Ear and Eye Specialist late of New York city, will visit the town, and will be at the Campbell House, Napanee, on the following dates, Thursday, Friday and Saturday, June 9, 10, and 11th, at which he will demonstrate his wonderful Patent Invisible Ear Drum. Any person afflicted with deafness can be made to hear as well as ever. This is no idle boast. In the past few years there have been several Ear Drum cures and not only have they proved defective and of no use in restoring the hearing, but were also clumsy and could be seen in the Ear.

THE INVISIBLE EAR DRUM OF TUGENDHAFT is entirely different in this respect. Not only will it restore the hearing but it is entirely invisible and cannot be seen when once introduced into the ears.

Mr. Tugendhaft has once been deaf and after squandering a small fortune on different remedies and on so called Inventions, finally perfected his new Drum within the past few years. In every case where his Drum has been used it has affected a complete cure.

See the celebrated Specialist at once and be convinced. No drugs used or no operation necessary. This Drum also stops all ringing noises and neuralgia pains in the head, where the cause is from deafness. The price of the Ear Drum is within the reach of all, and any person afflicted with deafness need not be so.

ARE YOU HARD OF HEARING—If you are I can assist you. I can help you to hear perfectly. I have for sale the celebrated Brand Hear-o-Phone a miniature Ear telephone, which has reached the highest point of perfection. IT EXCELLS ALL OTHERS—Because it is a perfect reproduction of the human voice, it has adjustable receiver. Not affected by temperature, and many other superior qualities.

M. D. TUGENDHAFT, Eye and Ear Specialist, 44 Yonge St., Toronto.

Remember the date, Thursday, Friday and Saturday, June 9, 10 and 11th.

once or write for list. We can suit you, and you will save time and money. Also some good town properties. W. G. H. BROWN, Real Estate. Opposite Royal Hotel, Napanee.

STRAWBERRY PLANTS FOR SALE. Varieties: Crescent, Dickie, Fendall, Heritage, Highland, Island King, Peconoke, Senator Dunlap, Three W's, World's Champion. J. W. & R. B. THOMPSON, Deseronto Road, Napanee.

FOR SALE—Residence of the late Mrs. Andrews, Piety Hill. Brick house, brick barn, and four lots. Phænon—in good order, new rubber tires on new wheels in first-class condition. Apply to H. B. SHERWOOD, at office or residence.

WANTED—Young Ladies to finish Underwear in Knitting Mill. Experienced and inexperienced. Steady work. Good wages paid to learners from start. Apply to KING TON Hosiery Co. Limited, Kingston, Ont. 23-c

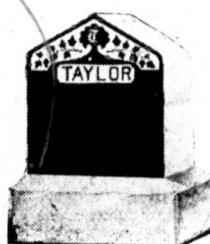

HOUSE AND LOT FOR SALE—On Robert Street, occupied by S. G. Hawley. Fine location, first-class repair, electric light, furnace, waterworks, full sized cellar, barn and henhouse. Also one slightly used piano and one new Doherty Organ, at bargain price. Apply at House, or Royal Shoe Store. S. G. HAWLEY. 23-b

FOR SALE—The house and lot situated on corner of John and Isabella streets, formerly occupied by the late Miles Hawley, fitted with all modern conveniences. Also one six bath tub, one phænon in good repair, one large walnut office desk, a complete set of tools of trade. For full information and particulars apply on the premises. 23-d

A twenty-five million dollar steel merger has been formed at Hamilton, taking in the Hamilton Steel Works, the Canada Screw Company, the Montreal Rolling Mills and the Canada Bolt & Nut Company.

#### Straw Hats Cleaned 10c.

We don't do the work but will sell you the material for 10c and it is as simple as A B C to use. Get it at Wallace's Drug Store.

**OPEN AIR MARRIAGE.**

Beside the Liddel Water, Lovers  
 Plighted Troth.

A sequestered grass slope among  
 the hills on the borderland of Eng-  
 land and Scotland was recently the  
 scene of an open air marriage, says  
 the London Daily Mail. The bride  
 resided on the Cumberland side of  
 the border, about 50 yards up the  
 hillside from the stream (Liddel  
 Water), which divides England and  
 Scotland, while the bridegroom is  
 a shepherd belonging to the Tiv-  
 ickhead district of the neighboring  
 Scottish county of Roxburgh.

The English marriage laws do not  
 allow of a marriage at a private  
 house, but it was desired that the  
 wedding should take place as near  
 the bride's house as possible. The  
 services of a Scottish minister were  
 obtained to perform the ceremony  
 which it was decided should take  
 place just over the river.  
 The bridegroom's party travelled  
 five miles over the hills from the

**GOOD BLOOD**

**GOOD HEALTH**

Just a Little More Rich, Red Blood  
 Cures Most Ailments.

The lack of sufficient red, health-  
 giving blood doesn't end merely in  
 a pale complexion. It is much  
 more serious. Bloodless people are  
 the tired, languid, run down folk  
 who never have a bit of enjoyment  
 in life. Food does not nourish,  
 there's indigestion, heart palpi-  
 tation, headache, backache, some-  
 times fainting fits and always nerv-  
 ousness. If anaemia or bloodless-  
 ness be neglected too long a decline  
 is sure to follow. Just a little  
 more blood cures all these trou-  
 bles. Just more rich, red blood;  
 then abounding health and vitality  
 and pleasure in life. To get more  
 blood the remedy is Dr. Williams'  
 Pink Pills. No other medicine in-  
 creases the blood supply so quickly  
 or so surely. The cure actually be-  
 gins with the first dose, though na-  
 turally it is not noticeable. This  
 is not a mere claim. Dr. Williams'  
 Pink Pills have been doing this over  
 and over again in Canada for years.  
 This is why thousands of people al-  
 ways have a good word to say about  
 this medicine. The following is the  
 experience of one of the many who  
 praise this medicine. Mrs. J. J.  
 Thibodeau, Bathurst Village, N. B.,  
 says: "Some years ago while teach-  
 ing school I became so run down  
 that I could hardly walk. My  
 breath was short and I had failed  
 in weight and lost color. I had to  
 rest several times on my way to  
 school and during school hours it  
 took more than all my strength to  
 fulfil my duty. My doctor advised  
 me to give up teaching and take a  
 long rest. But at this time a friend  
 persuaded me to try Dr. Williams'  
 Pink Pills and I got six boxes. I  
 hadn't finished the first box when  
 I felt a little better and by the time  
 I had used the six boxes I was fully  
 recovered and enjoying the best  
 of health. At a later date I was  
 troubled with eczema and my faith  
 in Pink Pills led me to try them  
 again, and I was not disappointed,  
 as they cured this trouble also. I  
 can't praise Dr. Williams' Pink  
 Pills too much for they have done  
 me a power of good."

Dr. Williams' Pink Pills are sold  
 by all medicine dealers or will be  
 sent by mail at 50 cents a box or six  
 boxes for \$2.50 by The Dr. Wil-  
 liams' Medicine Co., Brockville,  
 Ont.

**AS HIS NEIGHBORS SEE HIM.**

If he is poor, he is a bad man-  
 ager. If he is rich, he is dishonest.

If he needs credit, he can't get  
 it. If he is prosperous, every one  
 wants to do him a favor.

If he's in politics, it's for what  
 he can get. If he is out of politics,  
 you can't place him, and he's  
 no good for his country.

If he doesn't give to charity,  
 he's a stingy cuss. If he does, it's  
 for show.

If he is actively religious, he is a  
 hypocrite. If he takes no interest  
 in religion, he's a hardened sinner.

If he shows affection, he's a soft  
 specimen. If he seems to care for  
 no one, he is cold-blooded.

If he dies young, there was a  
 great future ahead of him. If he  
 lives to an old age, he has missed

**THE MYSTERY CLEARED UP;**

**OR, THE HERITAGE OF MADAME  
 YALTA.**

**CHAPTER VI.—(Cont'd)**

The dining-room was on the  
 ground-floor, an elevated ground-  
 floor, it is true, but the window was  
 not more than ten feet from the  
 ground. An adroit man might risk  
 the leap, nor did it seem impossible  
 to scale it. The valet leaned on the  
 balcony, measuring with his eye  
 the distance from top to bottom.  
 The master, on the pavement, mea-  
 sured it from bottom to top. The  
 men who guarded the door, and  
 those placed against the wall, ap-  
 proached the colonel and formed a  
 circle around him. The little troop  
 disposed itself as if for assault. The  
 man who held the horses brought  
 forward the berlin and placed it  
 under the window.

"They are about to invade the  
 house," Maxime cried out; "two of  
 them are climbing on the box; the  
 carriage is to serve them for a lad-  
 der."

"Ah! verily," exclaimed Bidard,  
 "that is too much. Right here, in  
 the finest neighborhood in Paris, to  
 have these brigands acting like  
 they believed it was the forest of  
 Bondy. I am going to give the  
 alarm—if monsieur does not op-  
 pose it."

At this moment the cock-crowing  
 sounded out still more clearly, ac-  
 companied by a rattling noise. A  
 falsetto voice cried out: "Cut-  
 throat!" A base voice roared:  
 "Scaling a wall—in the night—oc-  
 cupied house—band of malefactors  
 —galleys for life!"

These words, taken from the  
 penal code, had a prodigious effect.  
 The two men hoisted on the top of  
 the berlin were about to assist each  
 other in climbing the window,  
 where their companion was hold-  
 ing out his arms to them, when the  
 menace, hurled by an invisible wit-  
 ness, made them hesitate. At the  
 same moment was heard the open-  
 ing of the casements to all windows  
 of the house guarded by the por-  
 ter Bidard.

"All my people are astir," he  
 said, rubbing his hands; "the fe-  
 male tenant of the second floor, the  
 druggist of the first, and now we  
 shall have a play for nothing. The  
 druggist raves like anything, and  
 the female tenant dreams of mur-  
 der every night."

"Ah! a thousand thunders!"  
 vociferated a masculine voice,  
 "what's all that? Robbers pillaging  
 the house over there! Concierge,  
 look for the police—the guard!"

"Murder! fire!" shrieked a fe-  
 male voice.

"Ah! rascals, wait awhile," re-  
 sumed the man; "my revolver!  
 where is my revolver?"

Maxime determined not to show  
 himself, but to act according to the  
 course Borisoff should take. He  
 never lost sight of the boyard, who  
 showed unmistakable signs of per-  
 plexity, even of fright. Evidently  
 his attempt had failed, and nothing

touched him. If I'd had cartridges  
 I would have killed them all, but  
 unfortunately I had only one load."

"Fortunately, Papa Pincorne,"  
 said a young man who had just  
 come out of the house; "if you had  
 fired oftener you would have done  
 mischief. I was at my window, just  
 above you, with my friend Galo-  
 pardin, and your ball passed right  
 under our noses."

"Monsieur Falot, I have told you  
 before that it doesn't suit me to  
 joke with you."

"Upon my word it is true. Ask  
 Galopardin."

"I swear it," replied the clerk  
 who answered to this absurd name.  
 "I swear it by the concierge and  
 by this house; and here is Mlle.  
 Saint Gres who will bear witness to  
 having heard the hissing of this  
 projectile."

Mlle. Saint Gres was a person of  
 ripe years, of a spare figure, and a  
 pimpled face; the female tenant of  
 the second floor.

Maxime was not sorry to see all  
 the tenants collected together.

"Gentlemen," he said, "I have  
 not the honor to be known to you,  
 and since chance has led me to be  
 present at a singular spectacle—"

"I beg pardon, monsieur, who are  
 you?" asked the old druggist,  
 gravely.

Maxime was wishing to send to  
 the devil this ridiculous individual  
 who assumed the airs of a magis-  
 trate interrogating a prisoner. But  
 his situation was one in which he  
 had need of everybody, and he did  
 not disdain to conciliate the good-  
 will of Signor Pincorne.

"I entered," he said, "to make  
 some inquiries of the concierge,  
 when I saw arrive, in carriage and  
 on foot, the bandits who have at-  
 tempted to climb into that house.  
 Naturally, I remained to give as-  
 sistance to honest people. I am  
 the nephew of M. Claude Dorgeres,  
 banker."

"Good house, monsieur," said  
 the bass voice of the old druggist.  
 "House favorably known on  
 change."

"Wait," said one of the young  
 tenants of the third, "I know your  
 uncle's cashier."

"Really?" asked Maxime a lit-  
 tle surprised.

"I was quite intimate with him  
 before he was such a grandee. We  
 ate in the same restaurant; soup,  
 two dishes, half a bottle and des-  
 sert, thirty-six sous. His name is  
 Jules Vignory. Galopardin knows  
 him too."

"Yes," affirmed clerk number  
 two, "would you like a description  
 of him? Vignory (Jules), called the  
 rosiere of the Upper Saone, because  
 he was born at Vesoul and because  
 he is virtuous, twenty-six years  
 old, round chin, oval face—"

"I know the rest," said Maxime,  
 laughing. "Vignory is my intimate  
 friend, and I am pleased to meet  
 one of his cronies. But as we are

wedding should take place as near the bride's house as possible. The services of a Scottish minister were obtained to perform the ceremony which it was decided should take place just over the river.

The bridegroom's party travelled five miles over the hills from the nearest railway station and were joined by the bride's party. After the marriage the party recrossed the stream and ascended the hill to the bride's house.

#### MIOROBES IN MAIL BAGS

At a conference of Irish post office clerks in Dublin recently it was stated that the germs of consumption and other disease were in mail bags by thousands, and a resolution was passed that all mail bags should be washed and disinfected fortnightly.

#### HARDEST FOR HIM

"What was the hardest question the teacher asked you to-day?" asked the serious minded pupil.

Whether I preferred to take a looking of a note home, answered the scapegoat.

#### CURED HIS RHEUMATISM

Yanmouth N. S. June 2, 1908. I have been bothered with Rheumatism for the past year and have taken a good many kinds of medicine and found no relief for it.

One day a friend advised me to try GIN PILLS, so I did, and after taking only one box of them I felt like a new man.

I thought I would write you a few lines to let you know how thankful I feel for the relief they gave me, and would advise all sufferers from Rheumatism to get GIN PILLS.

WM. CONY.

Sample free if you write National Drug & Chemical Co. Dept. W.L. Toronto. All dealers have GIN PILLS at 50¢ a box, 6 boxes for \$2.50.

"This carpet is the best there is, madam," said the clerk. "It can't be beaten." Then I don't want it, replied the shrewd customer. "I want one that can stand beating once or twice a year."

The transition from winter's cold to summer's heat frequently puts a strain upon the system that produces internal complications, always painful and often serious. A common form of disorder is dysentery, of which many are prone in the spring and summer. The very best medicine to use in subduing this painful ailment is Dr. J. D. McFarlane's Dysentery Cordia. It is a standard remedy sold everywhere.

Even if a dollar doesn't go far it is difficult to induce it to return.

Keep Minard's Liniment in the house.

Every time a man makes a self-evident mistake it lessens his confidence in himself and others.

hypocrite. If he takes no interest in religion, he's a hardened sinner. If he shows affection, he's a soft specimen. If he seems to care for no one, he is cold blooded.

If he dies young, there was a great future ahead of him. If he lives to an old age, he has missed his calling.

#### FOR LITTLE BABIES AND WELL-GROWN CHILDREN

Baby's Own Tablets are good for all children, from the feeble baby whose life seems to hang by a thread to the sturdy well-grown child whose digestive organs occasionally get out of order. The Tablets promptly cure all stomach and bowel troubles and make sick, crying children, well and strong. Mrs. H. Greenfield, Embro, Ont., says:

"Baby's Own Tablets are a wonderful medicine for children. I have used them for several years and always keep them in the house for my little ones going to school." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### LONDON ORGAN GRINDERS

One pound a day is said to be the most that an organ grinder ever takes, while, with some exceptions, 5s. is about the least, so that a London organ grinder may be regarded as a fairly prosperous man. An organ can be hired from the makers for 1s. 6d. a day, while the price of a new organ is £25. The cost of setting an organ to new tunes is about £4, and, since novelty is essential, this is a frequent source of expense.

Some men seem to have a grudge against themselves, and we don't blame them.

Minard's Liniment used by Physicians.

#### AN ERA OF GOOD FEELING

My heart's so full of love to day  
For all my fellow men,  
I'd gladly knock somebody down  
To help him up again.

There can be a difference of opinion on most subjects, but there is only one opinion as to the reliability of Mother Graves' Worm Expeller. It is safe, sure and effective.

"Pa, what is writer's cramp?"  
"It's being cramped for money, my son. All writers suffer from it."

TRADING on a good name and deceiving the public is what the imitators of the well-known "The D. & L." Menthol Plaster are doing. Don't be fooled, insist on the genuine "The D. & L."

#### ANYTHING BUT THAT

"You're a liar, and a thief, and a scoundrel!"  
"Anything else?"

"I can't think of anything else right now."

"Thanks. I was afraid you were going to say I was stupid."

Friend "When Bilford went West he told me that as soon as he had settled down and pulled himself together he would write to me, but I have never heard from him." Native "Bilford was blown up in an explosion of dynamite three months ago. He may have settled down, but I don't believe he has pulled himself together yet."

where is my revolver?"

Maxime determined not to show himself, but to act according to the course Borisoff should take. He never lost sight of the boyard, who showed unmistakable signs of perplexity, even of fright. Evidently his attempt had failed, and nothing remained for him but to beat a retreat. He appeared, however, still to hesitate before decamping with his troops, and moved about uneasily, shaking his fist at the people who threatened him, reassembling his subalterns, and gesticulating violently.

By his order, doubtless, one of the men on the box dismounted hastily, and the other took the whip and reins. The man who had entered the house with Robert de Carnoel jumped from the balcony to the berlin and thence to the sidewalk.

The defeat turned into a rout. At this moment a pistol was fired by the terrible tenant of the first floor. The effect was not deadly—no one felt—but the explosion gave the signal for the rout. Borisoff hustled his men into the carriage, where they crammed themselves with some difficulty, and jumped in after them. The driver struck out his horses in the direction of the Avenue de Villiers.

"They fly, the cowards!" exclaimed Bidard, willingly showing himself now that all danger was past.

"They don't get off like that. Come, sir, this is the moment to cry 'Stop thief!' There's a station down there on the avenue. The soldiers will stop the carriage."

As he said this he precipitated himself into the street. Maxime made no effort to abate his ardor, and willingly followed.

He had little hope of capturing the berlin. Indeed, it was a small matter to him whether or not they captured Borisoff, but he was greatly concerned to know what had become of Robert de Carnoel, Madame Sergeant, and the countess-fencing-master. They must be in the house, and he counted on the tenants to assist him in forcing them out of their nest.

Just as he put his feet outside the door the victoria arrived at full speed.

Auguste, the faithful coachman, attracted by the pistol-shot, was hastening to the assistance of his monsieur.

"Stop!" cried Maxime, and Auguste stopped short.

"Good!" said Bidard, "we will jump into the milord and follow after the brigands."

"If the brigands are in the berlin which fled away down yonder, it's no use to start my mare after them; she couldn't catch up with ten thousand franc horses. I heard a pistol-shot. Was it monsieur that fired it?"

"No, and no one was hurt. I believe it was fired in the air."

"Who is it undertakes to say I fired in the air?" cried a rough voice.

Turning, Maxime found himself face to face with a grotesque personage; a coarse, little old man enveloped in a dressing-gown, and armed with a cavalry revolver.

"I beg pardon, monsieur," said Maxime. "I thought you wished simply to give the alarm."

"No, sir; I aimed for the chief of the robbers, and am sure I

he was born at Vesoul and because he is virtuous, twenty-six years old, round chin, oval face. "I know the rest," said Maxime, laughing. "Vignory is my intimate friend, and I am pleased to meet two of his comrades. But suffer me to remind you that we all have a duty to fulfil, that of warning the occupants of that house that rogues have attempted to force an entrance."

"Not worth the trouble. The box is empty. The Prussian has gone home."

"His friends have come back, M. sieur Falot," said the porter. "For a quarter of an hour a woman and two men have been there, without counting the servants. If you hadn't stayed so long at Cafe Cardinet, you'd have seen 'em go in as we did—monsieur and me."

"And me, too," cried the coachman. "I wasn't so near, but I've a pair of good eyes. And the husband offered me a hundred sous to take him to his house. I'd lay my life on it, he's just murdered his wife."

"A murder! Ah, mon dieu!" groaned the female tenant.

"The tragedies of jealousy," sneered Galopardin.

"It would be well to enter and search the house," said Maxime. "If a crime has been committed the victim has need of assistance perhaps."

"Enter! How! The doors are locked."

"By the window, then," said Falot. "Bidard must have a ladder; who hasn't?"

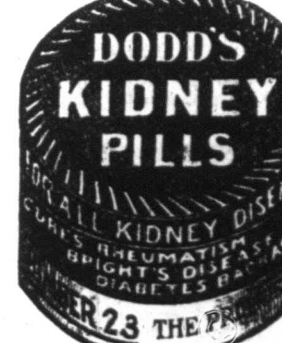

"What's a ladder for?" asked Auguste. "I'm going to put my carriage under the casement."

"Like the berlin a while ago! It's a good idea," said Maxime.

"Good!" cried Galopardin. "There is, perhaps, a corpse or two in there, and we are called upon to make a search. Falot and I will climb in with you. Bidard and Pincernet will guard the door, and Mlle. Saint-Gres will pray for us."

This programme was laid off in so decided a tone that no one objected, and Auguste hastened to lead his horse by the bridle to the spot indicated. It was less adapted for the purpose than Borisoff's berlin, but the intrepid Falot found that by standing on tiptoe he could lay hold of the window with his hands, and Maxime, following the example of the two clerks, raised himself of the strength of his wrists and leaped the balcony after them.

"We can't see a jot here," said Falot. "Wait, I have some matches in my pocket."

**DODD'S KIDNEY PILLS**

CURES ALL KIDNEY DISEASES

R23 THE PR

ISSUE NO. 21-10.

He struck a light which was sufficient to enable them to discern on a table a candelabra filled with wax candles, and in another minute the darkness gave place to an illumination.

It was, as Bidard had said, the dining-room. The cloth was laid on a table, in the middle of which was a chalice of old Saxony filled with rare flowers. But it did not appear that any guests had been seated at the table, and in the great empty hall the silence was profound.

"One might suppose it was the castle of the Sleeping Beauty of the woods," murmured Falot.

"Let us search," said Maxime. "First let us see what way this door leads—hold—it is locked on the outside."

"Let us begin by calling," exclaimed Falot, striking with his feet against the door.

"Hallo!"

No one answered to this appeal, but a murmur of voices in the street attracted the attention of the explorers. They hastened to the window and saw the tenants and porter in conference with two policemen, who had been attracted by the report of the pistol.

Maxime saw that the moment had come for his intervention. Together with the two clerks, he had in a few seconds joined the group, and was in a position to add his word to the somewhat confused conversation between the occupants of the house opposite and the guardians of the peace. He recounted briefly what had taken place, and so told his story as to lead the policemen to believe that a crime had in all probability been committed, and that it was imperative to search the house immediately.

All the doors were locked. The commissary of police alone had the right to have them opened, and one of the policemen went in search of him.

This magistrate resided in the neighborhood, and in twenty minutes he arrived, followed by a locksmith armed with all the implements of his profession. He listened attentively to Maxime's recital, the discourse of M. Pincorne, and, above all, the report of M. Bidard, who, in his quality of concierge of the house opposite, was in a position to certify to what had taken place for six months past; and finally concluded it was expedient to have a legal search of this singular abode, whose occupants showed themselves at intervals and disappeared like phantoms. By his order one of the policemen rang several times, and no one answering, he commanded the locksmith to operate.

It was the work of a moment, and they found themselves at the foot of a stairway, plunged in complete darkness. But the knowing Bidard had foreseen this case, and arrived with a lantern, which he hastened to place in the hands of the policeman, for he was not bent upon being the first to penetrate this dangerous castle.

The stairway led the visitors to a billiard-hall, an apartment which had three doors, including the one which opened from the stairway. One of them was locked, but the key was in the lock, and it was only necessary to turn it to pass into the dining-room, where the wax candles, lit by Galopardin, were still burning. The third communicated with a cabinet containing

## LAY FOR WEEKS AT DEATH'S DOOR

### BUT DODD'S KIDNEY PILLS CURED MRS. THOMPSON'S DROPSY.

It Started with Backache and Grew  
Worse Till the Doctor Said She  
Must Die.

Holt, Ont., May 16. (Special).—All the countryside here is ringing with the wonderful cure of Mrs. Samuel Thompson, who lay at the point of death for weeks, swollen with Dropsy so that the doctor five different times decided to tap her, but desisted because, as her husband said, "It might be better to let her die in peace." After the doctor had given her up Dodd's Kidney Pills cured her.

Mrs. Thompson's terrible trouble started with pain in the back. She grew worse and the doctor treated her for jaundice for eight weeks. Then her feet and legs began to swell, and it was realized that Dropsy was the trouble. For seven months she suffered. The doctor said there was no hope; she must die.

As a last resort Dodd's Kidney Pills were tried. The improvement was slow, but gradually her strength came back. To-day Mrs. Thompson is a well woman. She says, and the country-side knows, she owes her life to Dodd's Kidney Pills.

If the disease is of the Kidneys, or from the Kidneys, Dodd's Kidney Pills will cure it.

### HE KNEW A THING.

"So you think you can dress my shop window so that all the ladies will stop to look at it?" asked the master of a large business establishment of an applicant for work.

"Yes, sir, I do."

"Well, what is the first thing you would do?"

"Why, I'd put a large mirror in the window, and—"

"Quite enough, young man; I don't want you as an employee, I'll take you on as partner."

'Tis a Marvellous Thing. — When the cures effected by Dr. Thomas' Electric Oil are considered, the speedy and permanent relief it has brought to the suffering wherever it has been used, it must be regarded as a marvellous thing that so potent a medicine should result from the six simple ingredients which enter into its composition. A trial will convince the most skeptical of its healing virtues.

### ANGLING NOTE.

It is better to have fished and lost than never to have lied at all.

Your Druggist Will Tell You  
Murine Eye Remedy Relieves Sore Eyes,  
Strengthens Weak Eyes, Doesn't Smart,  
Soothes Eye Pain, and Sells for 50c. Try  
Murine in Your Eyes and in Baby's  
Eyes for Scaly Eyelids and Granulation.

"Don't be afraid of the bacon, Mr. Jenkins," said the landlady to the new lodger. "Not at all, madam. I've seen a piece twice as large and it did not frighten me a bit."

### LONDON'S WATER SUPPLY.

The Metropolitan Water Board of London, Eng., is considering a scheme to extend the water supply at a cost of thirty million dollars. It is proposed to construct enormous reservoirs in the Upper Thames Valley. These works when completed will afford thirty-five gallons per head per day for a population of twelve million souls, which London is expected to reach in 1941.

Some men have many possessions while others are not even self-possessed.

They Cleanse While They Cure.—The Vegetable compounds of which Parmelee's Vegetable Pills are composed, mainly dandelion and mandrake, clear the stomach and intestines of deleterious matter and restore the deranged organs to healthful action. Hence they are the best remedy for indigestion available to-day. A trial of them will establish the truth of this assertion and do more to convince the ailing than anything that can be written of these pills.

Don't kick if people distrust you. Who's to blame?

Minard's Liniment Lumberman's Friend.

Lady—"You say, professor, that tobacco is an aid to thought and a stimulant to the reasoning faculties; but Professor Greathead says tobacco is in every way injurious. How do you account for that difference. The Professor—"Easily enough, madam. Professor Greathead does not smoke, and consequently he can neither think straight nor reason correctly."

### Biliousness

Is certainly one of the most disagreeable ailments which flesh is heir to. Coated tongue—bitter taste in the mouth—nausea—dizziness—these combine to make life a burden. The cause is a disordered liver—the cure Dr. Morse's Indian Root Pills. They go straight to the root of the trouble, put the liver right, cleanse the stomach and bowels, clear the tongue and take away the bitter taste from the mouth. At the first sign of biliousness take

\$1.50 per day and up.

Patrons may take Taxicabs or Carriages from depot or wharves to hotel, charging same to The Lenox.

When in Buffalo stop at The Lenox. The accommodations and service are sure to please.

C. A. MINER Manager

A darning used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not send \$1.00 for a bottle and recipe book. Crescent Mfg. Co., Seattle, Wa.

Right at the starting point have a care. Many unreliable brands are offered. Whoever uses them pays

One of them of them was locked, but the key was in the lock, and it was only necessary to turn it to pass into the dining-room, where the wax candles, lit by Galopardin, were still burning. The third communicated with a cabinet containing a large amount of plate and glass. The commissary remarked that the window of this cabinet was open, a window which opened on a stairway composed of six steps, descending into a garden or rather court. "I see a ladder there placed against the wall," exclaimed Maximé.

A policeman mounted the ladder and saw that there was one also on the other side. The two portable ladders joined at the top. To mount and descend by this route was easy enough. This precaution proved that the inmates of the house anticipated the necessity of taking flight. At the foot of the ladder the moist earth preserved the prints of their feet. They were many and of all sizes. Five or six persons had passed that way. The fugitives who arrived pell-mell had pattered their feet several minutes before ascending the ladder in file, and Maximé could recognize the boots with sharpened heels, which marked the passage of Madame Urgent.

Maximé accompanied the commissary to the end of his search. The house underwent a thorough inspection from garret to cellar, as well as the grounds adjoining. They found nothing.

The commissary contented himself with taking down the names of those present, in case they should be required as witnesses, a case that appeared very improbable, for he began to believe in a hoax.

Maximé had to give his address, and mounted immediately in the vehicle of the faithful Auguste, not without having generously rewarded Bidard and taken leave of the two clerks, whom he even invited to dine with him, an invitation which they accepted in chorus.

(To be continued.)

Are you a sufferer with corns? If you are, get a bottle of Holloway's Corn Cure. It has never been known to fail.

#### A BOND OF SYMPATHY.

"Mr. Gidsmore," began the young man, "when you proposed to your wife—or to the estimable lady who is now Mrs. Gidsmore—did she tell you to ask her father?"

"She did, my boy," affably replied Mr. Gidsmore.

"And did you try to shirk the job?"

"Well, come to think of it, I did. I—I believe I tried to get her to do the asking. Ha, ha!"

"And when you did ask him—of course, you had to speak to him finally—"

"Of course, I did—of course."

"And when you did ask him, did your knees shake, and was your tongue dry, and did you have stage fright generally?"

"I was scared to death."

"Well, that's the way I feel. I told Gladys I knew I could find some mutual bond of sympathy between us when I came to tell you that she has promised to marry me!"

Mr. Jenkins," said the landlady to the new lodger. "Not at all, madam. I've seen a piece twice as large and it did not frighten me a bit."

Can you arrange the above sets of jumbled letters into the names of six well known fruits. If so, you can share in the distribution of the above prize. It is no easy task. But by patience and perseverance you can probably make out 6 or 8 of them. To the person who can make out the largest number we will give the sum of One Hundred Dollars. To the person making out the second largest number the sum of Fifty Dollars. To the person making the third largest number the sum of Twenty Dollars. To the person making the fourth largest number the sum of Ten Dollars. Should two persons send answers equally correct, the first two prizes will be divided between them, (each receiving \$75.00). Should three send in equally correct answers, the first three prizes will have to be divided, (each receiving \$50.00). Should four persons send equally correct answers, the whole sum of \$200.00 will be equally divided (each receiving \$50.00), and so on in like proportion, provided they comply with a simple condition about which we will write as soon as answers are received. We do not want a cent of your money when you answer this advertisement. If you can find any of the names, write us today enclosing stamp for our reply. Do not delay. To help you we have put a mark under the first letter of each name. Address, CANADIAN MEDICINE CO., Dept., 21, Montreal, Que.

## THE 'ROYAL' LINE TO EUROPE

SAILING FROM

# Montreal and Quebec to Bristol

TRIPLE TURBINE EXPRESS STEAMSHIPS

## Royal Edward and Royal George

Triple Screws, Marconi Wireless, Deep Sea Telephones, Passenger Elevators, 6 Passenger Decks, 12,000 tons.

The "Royal Edward" will inaugurate the fortnightly service of the Canadian Northern Steamships, Limited—The Royal Line—from Montreal and Quebec to Bristol on Thursday, May 26th.

### Best Appointed Steamers.

### The Most Picturesque Port.

### Only four days at sea.

The twin ships, the "Royal Edward" and the "Royal George" are the fastest triple screw turbine boats in the Canadian service. The British port is Bristol (two hours nearer than Liverpool.) Special trains alongside steamers within 110 minutes of London. The steamers are driven by the newest type of turbine engines, insuring a maximum of speed and minimum of vibration. Their equipment is the finest ever seen in the St. Lawrence. Large staterooms, spacious social apartments, sheltered promenade decks, artistic furnishings, perfect service, and ventilation by thermotank system, the fresh air being warmed or cooled as required.

For full particulars, rates, booklets, schedule of sailings, etc., apply any steamship agent, or write to H. C. BOURLIER, Gen. Agent Canadian Northern Steamships, Limited, Toronto, Canada.

# WITH THE MOUNTED POLICE

## The Governor-General Will Explore the Northern Wilds.

A despatch from Ottawa says: The northern wilds of Canada will probably have a distinguished visitor this summer. Earl Grey, who last year visited the Yukon, is contemplating a journey overland to Hudson Bay. If the present plans are carried out, the Governor-General will leave Ottawa in July for Winnipeg, and will there be taken by a party of the Northwest Mounted Police over the route of the Hudson Bay Railroad to Hudson Bay. This will involve a very stiff piece of wilderness travelling, much of it by canoe. At Port Nel-

son or Churchill, or Hudson Bay, whichever is chosen as the land terminus of the journey, the Governor-General will be met by the Government steamer Earl Grey, and in this vessel will journey through Hudson Bay and Hudson Straits, where commercial craft in a few years will be making regular voyages with cargoes of wheat and cattle from the Canadian west. The steamer will then come south and land His Excellency at Quebec. This will be the most ambitious piece of pioneer travelling ever attempted by a Governor-General of Canada.

# NOW IN THE FIFTH PLACE

## In 5 Years Canada Has Risen From 10th Place in Wheat-Producing Countries.

A despatch from Ottawa says: A statement prepared by the Census and Statistics branch of the Department of Agriculture shows that among wheat-producing countries of the world Canada now ranks fifth. In 1908 Canada ranked tenth. The total production of wheat in Canada last year is given as 186,744,000 bushels, as compared with 112,434,000 bushels in 1908.

Last year the wheat production by countries was as follows: Russia, 786,472,363 bushels; United States, 713,286,923 bushels; France,

361,050,500 bushels; British India, 253,592,377 bushels; Canada 166,744,000 bushels; Italy, 155,711,230 bushels; Spain 144,511,581 bushels; Germany, 138,399,277 bushels; Argentina, 133,581,000 bushels; Hungary, 125,363,287 bushels; Australia, 82,328,514 bushels; Great Britain and Ireland, 64,525,212 bushels. In 1908 the order of precedence in respect to production was as follows: United States, Russia, France, British India, Hungary, Argentina, Italy, Germany, Canada and Australia.

### EDMONTON TO WINNIPEG.

#### Scheme of Navigation to be Carefully Investigated.

A despatch from Ottawa says: A survey is to be immediately commenced to ascertain the possibility of making a navigable route between Edmonton and Winnipeg by way of the North Saskatchewan River and Lake Winnipeg. Explorers have reported that a six or eight foot waterway can be established on this route at a comparatively low cost, with few lockages, as the river has a deep and broad channel for nearly the whole distance. A vote of ten thousand dollars was made in Parliament last session to defray the cost of the survey. The survey will be made under the direction of L. R. Bagny, who was one of the sub-chiefs on the Georgian Bay Canal survey. Five parties will go in and carry on surveying operations on as many sections of the route. It is expected that the work will be finished this summer.

### THE KING'S BIRTHDAY.

Friday, June 3rd, Will be a Statutory Holiday.

A despatch from Ottawa says: The birthday of King George, June 3, will be a statutory holiday in

clares that the King's birthday shall be a statutory holiday.

### SHOT HIS SON-IN-LAW.

#### Two Men Had Plenty of Cause for Quarrelling.

A despatch from Wetaskiwin, Alberta, says: Louis Goldman, a former butcher at this place, was shot on Tuesday by his father-in-law, Serene Amand. Goldman married Amand's daughter six months ago, and an announcement clipped from a paper was sent to Goldman's wife in the old country. Amand heard of the first wife, and also having trouble over a cattle deal the men began quarrelling, and Goldman is reported to have given the old man a horsewhipping. He was dragged away by a man named Irish. Goldman went back at Amand again, when he received two shots in the forehead, and died shortly after. Amand was arrested.

### WHIPPING CHILDREN.

Chas. T. McLaughlin, Sixteen Years Old, Arrested on Suspicion.

A despatch from St. John, N. B., says: Charles T. McLaughlin, aged sixteen, was arrested on Thursday on suspicion following a series of outrages in which children were

# PAIN ALMOST DROVE HIM WILD

## DISEASE DEFIED TREATMENT WAS CURED AT ONCE BY "FRUIT-A-TIVES."

Mr. H. Marchessault, High Constable of the Province of Quebec, who lives at St. Hyacinthe, thought he was going to be disabled for life.

A terrible pain in the back kept him in the house and under the doctor's care for months. Nothing seemed to give relief.

Then he tried "Fruit-a-tives," the famous fruit medicine. Note the results.

"Fruit-a-tives" cured me of chronic pain in the back that was so severe that I could not drive my horse," writes Mr. Marchessault.

If you have Weak Kidneys and that Biting Pain in the Back, by all means try "Fruit-a-tives," which is made of fruit juices.

50c a box, 6 for \$2.50, or trial box, 25c. At all dealers, or from Fruit-a-tives, Limited, Ottawa.

### WITH A BLAZING WAGGON.

#### Runaway Horse at Ottawa Plunges Into Canal.

A despatch from Ottawa says: A runaway horse hitched to a blazing popcorn waggon, heading down Nicholas street and plunging into the Rideau Canal, a mile away, with flames of burning gasoline from an exploded gasoline tank spouting high in the air behind the terrified animal, provided an exciting spectacle for residents of Ottawa East on Friday night. The gasoline tank exploded as the driver was peddling popcorn in front of his waggon on Nicholas street. With the waggon ablaze and spots of burning gasoline covering the horse, the frenzied animal bolted down the street, turned into Echo drive and at the end of a mile run plunged into the Rideau Canal to escape the flames. Humane Inspector Lemoine, with the assistance of a crowd of spectators, succeeded in getting the horse, still hitched to the charred remnants of the waggon, ashore. The animal, though severely burned, came through the perils of flood and fire without fatal injuries.

### "WHY BE SO THIN?"

Thinness is Embarrassing, Unhealthy and Not Natural—Formula Now Used Which Adds From One to Three Pounds a Week.

Every one ought to have some extra flesh on the bony structure of the body, both for the sake of health and self-esteem.

Most thin people are sensitive to the harsh, unfeeling criticisms which are constantly being hurled at them by the more fortunate well-figured persons.

Every one pities a thin, bony horse, but horses don't know it—while thin people are both pitied and ridiculed. It ought not to be, but it is.

A well rounded figure, be it man or woman, excites admiration; not only for the figure but for the bright eyes, pink cheeks, red lips, and vigorous carriage which accompany a well-nourished body.

Strength, health, beauty and sound flesh abound, if the blood and nerves get enough nourishment out of the food eaten.

This prescription aids nature; helps absorption, digestion and assimilation; helps distribute the blood and nerve elements which make sound flesh. Get the ingredients and make it at home, and see how very fast you gain in weight. In a half pint bottle, obtain three ounces of essence of pepsin, three ounces syrup of rhubarb. Then add one ounce compound

Friday, June 3rd, Will be a Statutory Holiday.

A despatch from Ottawa says: The birthday of King George, June 3, will be a statutory holiday in Canada, although, in view of his Majesty's proclamation that he would follow the precedent of King Edward and keep May 24 as the Empire's general holiday in honor of the Sovereign, there will be no general observance of next Friday as a holiday. Being a statutory holiday, however, all banks will be closed, thus making the third bank holiday in Canada within two weeks. The Cabinet Council on Saturday decided that no proclamation should be issued to exempt Friday next from the provisions of the bills of exchange act, which de-

Chas. T. McLaughlin, Sixteen Years Old, Arrested on Suspicion.

A despatch from St. John, N. B., says: Charles T. McLaughlin, aged sixteen, was arrested on Thursday on suspicion following a series of outrages in which children were the victims. In four or five cases within a month or so, boys or six or seven were taken by a youth to out-of-the-way places, and there partly stripped and beaten severely, a rope being used in one case, a belt in another. Four of the young boys and a girl of seven confronted McLaughlin after his arrest and said he was the one who attacked them.

The Government is sending the steamer Stanley with a surveying party to Hudson's Bay.

## A SURE SIGN OF GROWTH

### Labor Department Reports Increase of Fifty Per Cent. in Building.

A despatch from Ottawa says: A report issued by the Labor Department reviewing the building operations in Canada for 1909 shows that the total value of new buildings erected in 82 chief industrial centres of the Dominion was \$85,133,077, an increase of approximately fifty per cent., as compared with the preceding year. Nearly all the cities and towns showed substantial increases.

The only localities from which returns were received on Thursday

to the effect that the year was less active than in 1908 were Halifax and Amherst, N.S.; Charlottetown, P.E.I.; Newcastle, N.B.; Sherbrooke and Hull, Que.; Smith's Falls, Collingwood, Niagara Falls, St. Catharines, Guelph, Berlin, Stratford and Sault Ste. Marie, Ont.; Edmonton, Alta., and Nelson, B.C. For the present year the permits issued in nearly all the larger centres show another large increase over last year's record.

## NEED OF MIXED FARMING

### Mr. William Whyte's Prescription for the Prairie Provinces.

A despatch from Toronto says: Mr. William Whyte, Second Vice-President of the Canadian Pacific Railway, prescribes mixed farming for the western wheat grower.

"I know of no more indolent life than that of the wheat-grower," said Mr. Whyte, in an interview the other day. "After he has gathered his crop there is absolutely nothing for him to do until the following spring. Because of this we find the average westerner leaving his holdings and wintering at the coast or in California. I think if he could be induced to take up the feeding of cattle in the stalls and the raising of hogs, that it would be a blessing to him and to the great plains country as well."

"Years ago," said Mr. Whyte, "southern Alberta was one vast grazing country. Countless herds ranged there. To-day the great bulk of that land has been transformed into wheat lands. Unless the farmer takes up the work of feeding cattle in the stalls I do not know where the meat supply of the world is to come from. And take hogs. At the present market price of pork it is quite possible for a farmer to make his poor grade wheat, or the damaged variety,

easily worth three dollars a bushel. Western packers tell me there is no better tasting or sweeter bacon than that raised on wheat. So you can see to what advantage the big wheat-grower could turn his surplus crop, provided he did so without making a regular business of it and so glutting the market."

"Anyway," he continued, "the westerner is being forced into diversified farming because of the difficulty in procuring men to harvest his wheat. Look at the great crop there now. It has all to be gathered in a short time or else the wind will break the husks and half of it will be lost. Last year we took out for him an army of 30,000 men. We had some difficulty in getting that number, and what will the situation be as the acreage extends?"

"This year the area sown in wheat in the Provinces of Manitoba, Alberta and Saskatchewan will be from eight to eight and a half million acres. Saskatchewan alone will have about 4,600,000 acres, and there are ninety million acres of arable land between the 49th and 55th parallels of latitude in that Province alone. We have only touched the fringe as yet."

Butter—Creamery prints, 22c to 22c; Separator prints, 20c to 21c; Dairy prints, choice, 19c to 20c; Inferior, 15c to 16c.

Eggs—19c to 20c per dozen in case lots.

Cheese—12c for large and 12½c for twins. Old cheese, 12½c for large and 13c for twins.

Beans—\$2 to \$2.10 per bushel for primes and \$2.10 to \$2.20 for hand-picked.

Potatoes—Delawares, 55c to 60c per bag out of store and at 45c to 50c on track Toronto, and Ontarios 35c to 40c per bag on track.

#### PROVISIONS.

Wholesale quotations:—

Pork—Short cut, \$31 to \$31.50 per barrel; mess, \$28.50 to \$29.

Lard—Firm; tierces, 16c; tubs, 16½c; pails, 16½c; stocks very light.

Smoked and Dry Salted Meats—Long clear bacon, tons and cases, 15½c to 15¾c; backs (plain), 21c to 21½c; backs (pea-meal), 21½c to 22c; shoulder hams, 14c to 14½c; green meats out of pickle, 1c less than smoked.

Rolls, smoked, 15c to 15½c; medium and light hams, 18c to 18½c; heavy, 16½c to 17c; bacon, 19c to 20c.

#### BUSINESS IN MONTREAL.

Montreal, May 31.—Oats—No. 2 Canadian Western, 37½ to 38c; No. 3, 36½ to 37c; Ontario No. 2 white, 34c; do., No. 3, 33c; do., No. 4, 34c. Barley—No. 3, 56½c; No. 4, 55c; feed barley, 54c. Flour—Manitoba Spring wheat patents, firsts, \$5.60; do., seconds, \$5.10; Winter wheat patents, \$5.25 to \$5.35; Manitoba strong bakers', \$4.90 to \$5; do., in bags, \$2.25 to \$2.35; extras, \$2 to \$2.10. Feed—Ontario bran, \$19.50 to \$20; Ontario middlings, \$22 to \$23; Manitoba bran, \$18.50 to \$19; Manitoba shorts, \$21 to \$22; pure grain mouillie, \$22 to \$23; mixed mouillie, \$25 to \$26. Cheese—10½ to 11½c. Butter—From 23½ to 24½c. Eggs—Selected stock, 22 to 22½c; straight receipts at 19 to 20c per dozen.

#### LIVE STOCK MARKETS.

Montreal, May 31.—Prime beefs sold at from 6¼ to 7½c per pound; pretty good animals, 5½ to 6½c, and the common stock at 4½ to 5½c per lb.; milch cows, \$30 to \$60 each; calves from \$3 to \$10 each, or 3½ to 6c per lb.; sheep, 5 to 6c per lb.; lambs at \$4.50 to \$6 each. Good lots of fat hogs sold at 10 to 10½c per lb.

Toronto, May 31.—A limited number of choice heavy cattle are quoted as high as \$7 and \$7.30, but the average range for the best butcher stock was from \$6.40 to \$6.60. The medium and common grades of butcher cattle brought from \$5.50 to \$6.25. Cows and bulls for butcher purposes, \$5.90 and \$6 per cwt. for the best quality, with secondary grades from \$4.50 to \$5.25. Milkers and springers, \$65 and \$74 per head, with the low figure of the range fixed around \$45. Sheep and lambs were steady. Hogs weaker at \$9.50 to \$9.75.

#### UNITED STATES MARKETS.

Minneapolis, May 31.—Wheat—May, \$1.08; July, \$1.07 to \$1.07½; September, 96½c. Cash—No. 1 hard, \$1.11½ to \$1.11½; No. 1 Northern, \$1.08½ to \$1.10½; No. 2 Northern, \$1.06½ to \$1.08½; No. 3, \$1.03½ to \$1.05½. Bran—\$18 to \$18.25. Flour—First patents, \$5.30 to \$5.50; second patents, \$5.10 to \$5.30; first clears, \$4.15 to \$4.25; second clears, \$2.90 to \$3.20.

blood and nerve elements which make sound flesh. Get the ingredients and make it at home, and see how very fast you gain in weight.

In a half-pint bottle, obtain three ounces of essence of pepsin, three ounces syrup of rhubarb. Then add one ounce compound essence cardiol, shake and let stand two hours; then add one ounce tincture cadomene compound (not cardamom). Shake well and take a teaspoonful before meals and one after meals. Also drink plenty of water between meals and when retiring. Weigh yourself before beginning.

#### WEATHER CHANGEABLE.

Snow and Sleet Follow a Hot Day in the West.

A despatch from Winnipeg says: The weather man continues his queer vagaries. Friday was oppressively hot and close, ideal crop weather. Saturday was cold, with high winds; all night snow and sleet, and the thermometer close to freezing. Following recent rains, however, reports from all parts of the west are most optimistic. Some old farmers go as far as to say they cannot remember a season with less real cause for complaint. The early seeding, with the cold weather following, caused heavy rooting, and the growth will be very fast and strong when the hot weather finally arrives. Brandon district reports the crops looking as well as ever they did at the same time of the year. In four days of hot weather the growth was phenomenal.

#### FRUIT TREES BURNED.

Thirty Thousand of Them Destroyed at Vancouver.

A despatch from Vancouver, B. C., says: The Provincial Fruit Inspector held a bonfire here on Thursday, destroying thirty thousand insect-laden trees from Ontario, United States, France, Belgium, Germany and Holland, part of one million trees shipped to British Columbia this winter. There were enough germs to have horticulturally infected the whole Province, but not one tree escaped the British Columbia inspection, which is said to be the most rigid of any country in the world. British Columbia is practically immune from injurious orchard pests as a result. Inspectors from recent tours of Okanagan and Kootenay could find no trace of the mischievous codling moth or San Jose scale, and report that from Okanagan alone at least one thousand carloads of perfect fruit will be shipped this summer and fall.

#### ROMANCE IN HIS LIFE.

But Now He's Charged With Trying to Kill His Wife.

A despatch from Brantford says: Antonis Steinposka, a Russian, was charged by his wife with attempted murder here on Wednesday. The evidence brought out an interesting romance. Steinposka was a guard at Warsaw, and secured life imprisonment for allowing a state prisoner to escape. He feigned lunacy and later escaped from the asylum to Canada. His wife followed him. Recently quarrels developed. The prisoner was remanded.

# CONDENSED-NEWS ITEMS

## HAPPENINGS FROM ALL OVER THE GLOBE.

### Telegraphic Briefs From Our Own and Other Countries of Recent Events.

#### CANADA.

The C. P. R. will rebuild the bridge at Lachine. There have been no forest fires in Ontario this year.

General Traffic Manager Tiffin of the Intercolonial is in favor of extending the railway to Toronto.

The Canadian Northern has filed plans with the Railway Commission for its entrance to Ottawa.

Manufacturers are successfully competing with farmers for men brought out under Government auspices.

Mrs. Mary Johnson, an aged widow of Stamford, was killed by a train at a railway crossing, on Saturday.

Luigi Rosso was fined fifty dollars at Niagara Falls for assisting his brother, a prohibited immigrant, to enter Canada.

Reggie Bell, aged three of Parry Sound, and Leonard Friend, aged four, of Kingston, were drowned, on Saturday.

Amendments to the liquor laws, fixing the hours of closing bars, rooms and stores, were introduced in the Quebec Legislature.

The Rutherford Government of Alberta has resigned, and Chief Justice Sifton has been called on to form a new Government.

Nine mines shipped over 600 tons of ore from Cobalt last week, the largest consignments being despatched by La Rose and Kerr Lake properties.

Harry Southwell, a young Englishman, out of work and despondent, shot himself near Brantford. His body was found in the bush by some boys.

The 25th anniversary of the death of Dolland and his heroic band, who saved Ville Marie from an attack by the Iroquois Indians, was celebrated at Montreal on Sunday.

A right of way through Garden River Reserve has been secured for the railway from Sault Ste. Marie to Sudbury, and tenders for the construction of the road will be called at once.

The woodwork surrounding the boiler of a Grand Trunk locomotive attached to the International Limited caught fire near Brockville, on Friday, and the engine was considerably damaged.

It is reported that Sir William Van Horne will leave shortly for Australia to advise the Government regarding the construction of a railway across the continent, with extensive irrigation works.

#### GREAT BRITAIN.

The Earl of Stamford is dead. It is suggested that King George's coronation take place on Empire Day next year.

Twenty-two persons were drowned in a collision between two steamers in the English Channel.

Queen Alexandra received the High Commissioners of Canada and Australia in audience, and expressed her gratitude for the expressions of sympathy sent her from the overseas colonies.

# ROYAL YEAST CAKES

Congo. All the Jews in Moscow with the exception of 191 families of the first guild have been ordered to produce proofs of their right to remain outside the pale.

### HIT BY COMET'S TAIL.

Strange Story of the Crew of the Minnie Maud.

A despatch from Montreal says: Capt. Robert of the steamer Minnie Maud of Gaspe is positive that his steamer passed through the tail of Halley's comet on the night of the 19th of May. According to the story the captain told here on Friday, the man on watch was almost overcome by sulphurous gas. The night was calm, and the man was at a loss to account for the disturbance. The air became so stifling that the watch grew alarmed and charged into the cabin, where he aroused the captain, who in turn called the other members of the crew, a man and boy. To keep out the choking gas the Minnie Maud's crew were compelled to cover their mouths and noses with handkerchiefs for breath filters. All were more or less overcome with a feeling of dizziness, which continued for an hour, until a cool puff of wind cleared the atmosphere. The sailor then knew that they had passed through the tail of the comet and were safe.

### FROM ALBANY TO NEW YORK.

Glen Curtiss Made a Flight of 150 Miles.

A despatch from New York says: Glenn H. Curtiss, known as the aviator who had captured the international speed trophy at Rheims, France, arose from the tide flats of Van Rensselaer Island at Albany at 7 o'clock on Sunday morning in the smallest biplane that has figured seriously in the world's great flights, sped upward to a height of 1,000 feet, maintained it for forty miles, then swung over the Catskills at a far greater height, once attaining a maximum of almost 5,000 feet, dropped down above the Hudson waters for another forty miles, and landed finally at Governor Island at noon. He

had covered 150 miles in an actual flying time of 2 hours and 46 minutes.

### 8,000 BUILDINGS BURNED.

Details of the Disastrous Fire in North Japan.

A despatch from Victoria, B. C., says: Details of the disastrous fire at Aomori, North Japan, in which one hundred persons were burned to death and 8,000 of the town's 11,500 buildings were razed, with loss of \$2,000,000, were received by the steamer Inaba Maru on Wednesday. The burned area covered one and three sevenths miles long and a quarter mile broad. Thirty thousand homeless were gathered in refuge camps. Great suffering followed the fire, and supplies of rice brought in were eaten raw by the ravenous people. A store of powder exploded and shook the whole area soon after the fire was extinguished.

### LABOR SCARCE IN B. C.

Railways Said to be Curtailing Building Plans.

A despatch from Victoria, B. C., says: That a grave crisis has arisen affecting the development of British Columbia, owing to the inade-

quate supply of labor, is the opinion of the heads of all large enterprises, especially those of projected railways. It is said the programmes planned for this season by the C. P. R., the Canadian Northern and others have been abandoned, or greatly curtailed, for this reason, and the C. T. P. is finding the greatest difficulty in getting sufficient men to work on the section being constructed east from Prince Rupert. The only possible remedy would be the introduction of Chinese on a large scale, but the labor unions will not listen to this for a moment, so it is out of the question.

### TELL FOUR HUNDRED FEET.

F. Bamber Killed at the Temiskaming Mine in Cobalt.

A despatch from Cobalt says: F. Bamber, an Englishman, with a wife in London, England, aged about 25 years, was instantly killed at the Temiskaming mine on Wednesday. Mr. Bamber, who was head of the sorting apparatus, lost his balance or was possibly struck by the descending cage, and fell down the shaft, a depth of eight hundred feet, being a startling fall. The body was badly broken.

## Canadian Appreciation

Langham Hotel, London.

Gentlemen,—I wish to express my appreciation of the 38 h.p. Daimler which you have delivered to me. Before ship- ping the car to Canada I made a three weeks' trial of it, cov- ering some 1,200 miles. The car ran perfectly, and I never had the slightest trouble of any kind, and I think it quite lives up to the many claims you make for it. The silence, smooth- ness of running, and power of acceleration on hills is really remarkable.

My petrol consumption was 16 miles to the gallon, includ- ing a great deal of driving in traffic. The tyres show no ap- preciable signs of wear, and I think it will prove light on tyres.

I am really delighted with the car.—Yours sincerely,

(Signed) C. A. BOONE, of Toronto, Canada.

60 YEARS'  
EXPERIENCE

## NORTHERN ONTARIO

A New Land of Promise  
Visited by Press Rep-  
resentatives.

At the conclusion of the annual con-  
vention of the Canadian Press Associa-  
tion held in Toronto a couple of weeks  
ago about one hundred and twenty of  
the members of the Press Association,  
with a number of guests, boarded a  
special train at Toronto for a trip  
through Northern Ontario, a land that  
most people have heard talked about  
but which few of the newspaper men  
had ever seen. The train was com-  
posed of pullman cars and diners and  
was placed at the disposal of the party  
by the Grand Trunk Railway Company  
for the trip and was complete in every  
particular for the entertainment of  
the party.

Few of the party had previously  
possessed anything but a hazy idea  
of the vast country known as New  
Ontario and its possibilities and de-  
velopment.

The Grand Trunk Railway and the  
Temiskaming and Northern Ontario  
Railway (owned by the Province) co-  
operated in making the excursion a  
unique one; and Mr. J. D. Macdonald,  
district passenger agent of the G. T. R.  
and Commissioners Murphy and  
Dane and Superintendent Black of the  
T. and N. O., accompanied the party  
as hosts and guides. The train ran  
over the G. T. R. to North Bay, then  
north over the entire T. and N. O. R.  
to Cochrane, and later over a section  
of the National Transcontinental or  
Grand Trunk Pacific, west and east of  
that point.

Everybody knows that up in the  
northern country somewhere is Cobalt,  
rich in rocks, silver, mines, prospects,  
wildcats, and other things. Every  
body knows, too, that somewhere up  
north is a clay belt and thriving towns

etc., wear picturesque costumes—Stet-  
son hats, brilliant handkerchiefs at  
the neck in Western style, leather  
gauntlets, and khaki clothes, in addi-  
tion to the regulation high-laced  
"witch elk" boots. But there is little  
else about the place to appeal to the  
imagination. The miners are of every  
nationality, and among them are, no  
doubt, many of the bad men we read  
about in tales of mining camps; but  
they look tame, tired, and dull. The  
visiting newspapermen didn't see any  
fellows who looked very dangerous and  
most of the party met people from  
their home towns.

The visitors were divided into  
squad to visit the most important  
mines and were shown through the  
mines, concentrators &c and allowed  
to see for themselves some of the vast  
riches being uncovered in the camp.  
All the visitors were royally entertain-  
ed at the various mines.

The capital invested in plants on the  
big mines must run into surprising  
figures, and the new concentrators re-  
cently installed, which condense the  
silver to a marketable condition, will  
greatly reduce shipping expenditure,  
and in consequence, of course, increase  
the companies' profits. Four and a  
half million dollars' worth of ore was  
shipped last year, and among the op-  
erators there seems general confidence  
of the future of legitimate mining.

Haileybury and New Liskeard.

Four miles beyond Cobalt is Hailey-  
bury. An electric line now runs be-  
tween the towns as well as the railway  
and many people connected with the  
mines live at the latter place. The  
town is quite prettily situated on Lake  
Temiskaming, and altogether it is a  
pleasant place in which to live. There  
also is in Haileybury a vein of calcite  
which never gives out. There are  
bars there, and, as one resident ex-  
pressed it, they are like curling rinks—  
long and narrow and always full. The  
newspaper-men witnessed no excesses  
in this direction, however.

There is no mining around Hailey-  
bury, and no farming. It is a distri-  
buting point midway between the mi-  
neral region and clay belt. It has  
about 5,000 people, and is a fine, busy,  
growing community.

About half-way between Haileybury  
and New Liskeard the rocks end and  
the clay land begins. New Liskeard  
is five miles from Haileybury. It is  
the oldest town in the north, having  
an advantage of a few years over  
Haileybury, which five years ago had  
only about 400 people. Liskeard is  
smaller than its rival, and seems for  
the time rather at a standstill. But  
whether mines fail or not it will grow  
in time because it is the centre of a  
district of great agricultural possibili-  
ties. The visiting journalists were  
driven out several miles through the  
country, and saw everywhere good  
farms springing up. The land is clay  
loam, apparently as fine as can be seen  
anywhere around Napanee, and settlers  
are becoming quite numerous. Liskeard  
has a very fine waterworks system,  
and has issued debentures for a  
sewerage system. These towns all  
have electric light, and most of the  
other utilities common "at the front."

At the end of the T. and N. O., 140  
miles beyond New Liskeard, and 500  
miles north of Toronto, is Cochrane,  
the outpost town. It is only eighteen  
months old, but it claims a resident  
population of 900, and a floating popu-  
lation of 1,400. Cochrane took the  
eye of the journalists perhaps more  
than any of the other towns. It was  
full of life, and the real thing in out-  
posts. The streets are now being  
"grubbed," and piles of stumps are be-  
ing burned on the streets; but the  
buildings are very tidy, some of them  
being brick. The town is being laid  
out with a view of making it a permanent  
and

## Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader is good standing may pre-empt a quarter-section along-side his homestead. Price, \$300 per acre. Duties.—Must reside six months in each of six years from date of homestead entry including the time required to earn homestead patent and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties.—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. CORY,

Deputy of the Minister of the Interior.

that point. Everybody knows that up in the northern country somewhere is Cobalt, rich in rocks, silver, mines, prospects, wildcats, and other things. Everybody knows, too, that somewhere up north is a clay belt and thriving towns like Haileybury and New Liskeard. But very few people know how to get to these places, what they are like, how far they are apart, where the rock ends and the clay begins, and, indeed, most of the things really worth knowing about this wonderful region.

Leaving Toronto at 10 p. m. in the evening North Bay was reached in the early morning and after a short stop for a change of engines, the train was taken to Cobalt the famous silver camp, arriving there at 10 a. m.

All the way from North Bay the country is rocky, and it gets rockier and rockier until at Cobalt nature has piled up stone and thrown it about in such a manner as to suggest that she was trying to say to the first men going that way: "Hold on! Stop here and look around. This is one of my big show places. There will be something doing here some day!"

Cobalt Lake is not very big, but very dirty. The shores are piled with rock, and on the west shore, where the rocks are rockiest, is piled the principal part of Cobalt. The hills in all directions have been bared by axe and fire of trees, and the general prospect is a dreary one of stumps and rocks, over which go crawling the miles of compressed air pipes which furnish power to the mines. For the mines are not all clustered around the camp, but are scattered over miles of territory. And under Cobalt Lake and the other lakes around, and under the town itself, the miners are burrowing for silver. The entire townsite is owned by the mines, and the whole region is composed of claims and prospects where there are no mines.

Cobalt is well named a camp. It is said to have 5,000 people without counting the mine workers and floating population of several thousands. There are more stores in the place than in the ordinary town of the same size. But it is not a town of homes. No one lives there who can help himself. Surface rights or leases can be secured, but nothing else, and as the surface is not pleasant to the eye, all who can do so go to Haileybury, four miles north to live.

There is no romance about Cobalt. A few of the prospectors, representatives of Eastern drilling companies,

## PURIFIED HIS BLOOD

Dr. Morse's Indian Root Pills  
Healed Mr. Wilson's Sores

When the sewers of the body—bowels, kidneys and skin ducts—get clogged up, the blood quickly becomes impure and frequently sores break out over the body. The way to heal them, as Mr. Richard Wilson, who lives near London, Ont., found, is to purify the blood. He writes:

"For some time I had been in a low, depressed condition. My appetite left me and I soon began to suffer from indigestion. Quite a number of small sores and blotches formed all over my skin. I tried medicine for the blood and used many kinds of ointments, but without satisfactory results. What was wanted was a thorough cleansing of the blood, and I looked about in vain for some medicine that would accomplish this.

At last Dr. Morse's Indian Root Pills were brought to my notice, and they are one of the most wonderful medicines I have ever known. My blood was purified in a very short time, sores healed up, my indigestion vanished. They always have a place in my home and are looked upon as the family remedy."

Dr. Morse's Indian Root Pills cleanse the system thoroughly. Sold by all dealers at 25c a box.

full of life, and the real thing in outposts. The streets are now being "grabbed," and piles of stumps are being burned on the streets; but the buildings are very tidy, some of them being brick. The town is being laid out with an idea of permanence, and the visitor goes away believing it will have a future as astonishing as its brief past. Standing there 500 miles north of Toronto, and within striking distance of James Bay, with a railway running south and another starting east and west; in the midst of thousands and thousands of acres of fine clay land awaiting the plow, a man gets a new idea of the immensity and potential wealth of this great Province.

On the day of the King's funeral the party went west on the G. T. P. line to the Metagami River, a stream 600 feet wide, thirty-five miles from Cochrane. And at three o'clock a short memorial service was led by Dr. MacDonald of the Globe and Rev. Mr. Spence, a clergymen of the district. It was an impressive scene away up there in front of a construction gang's shanty. But the incident that will be remembered longest by the visitors was the meeting with the school children of Cochrane a few hours before. About eighty little pioneers marched down near the railroad, and were addressed by Mr. J. F. McKay, the president of the association. And perhaps there was no more moving sight in the whole Empire that day—to anyone of imagination—than those children bare-headed, singing "God Save the King," on a lumber pile at that far-out post.

## The General Outlook.

Returning, the party visited the Government Experimental Farm at Monteith, stopped at Englehart, where the T. and N. O. Commission has fine conservatories, and at Temagami Station, the gateway of the Temagami Lake tourist region.

A tourist resort, a great mining region, and a great agricultural region—all these are discovered in turn in Northern Ontario.

The country has its faults, and the people there have their troubles. The forest is neither stately nor pretty. The tree growth is dense, but light, mostly spruce, birch and poplar. For many miles there is no lumbering, the trees not being large enough to make railroad ties. There is practically no bird life. Some of the lakes in the far north have no fish, although the Temagami lakes have many. The prospect from the railroad is mostly very desolate. But a few years will see remarkable changes, now that transportation is being made easy.

The Temiskaming people complain bitterly about neglect on the part of the Government. They want drainage and other things. They protest against stumpage dues and other forms of Government "graft." And it really seems they are not getting fair play in all things. But these matters will be adjusted, let us hope, without much delay. Indeed, there must soon be in New Ontario a population large enough to make its voice heard both in Toronto and Ottawa. It is a great country, and young men of Old Ontario looking for homesteads ought to see it before going to the North-West.

## FIG PILLS

Cure Backache, Bladder  
and Kidney Trouble

A few doses of Fig Pills will convince you that a few more will cure you. Every box of Fig Pills are guaranteed. If they don't cure all Bladder, Kidney, Rheumatism and Liver Trouble, your money will be refunded. 25c a box, at all leading drug stores.

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Charles H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

### A WINDSOR LADY'S APPEAL

To All Women: I will send free, with full instructions, my home treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of the Womb, Painful or Irregular Periods, Uterine and Ovarian Tumors or growths, also Hot Flashes, Nervousness, Melancholy, Pains in the Head, Back, Bowels, Kidney and Bladder troubles where caused by weakness peculiar to our sex. You can continue treatment at home at a cost of only about 12 cents a week. My book, "Woman's Own Medical Adviser," also sent free on request. Write to-day. Address Mrs. M. Summers, Box 851, Windsor, Ont.

### Making Them All One.

An elderly minister is fond of telling of a "break" he once made at a double wedding of two sisters. It was arranged that the two couples should be married with one ceremony, the two brides responding at the same time and the two bridegrooms doing the same. There had not been a previous rehearsal, as the minister had come a long distance and had reached the church but a few minutes before the time for the ceremony. All went well until it came time for the minister to say, "And now I pronounce you man and wife." It suddenly became obvious to the minister that the usual formula would not do in the case of two men and two wives, and he could not think of any way of making "man" and "wife" plural in the sentence. In his desperation and confusion he lifted his hands and said solemnly: "And now I pronounce you, one and all, husband and wife!"

### LOSING OUR SKILL

Deft Fingers Are Rendered Useless Because of Machinery.

It is asserted that we of to-day are losing the use of our hands. One writer declares that men have no longer many physical qualities which were developed in the stress and strain of their savage life. The man of to-day is inferior, in certain points, to the savage who made the flint implements. It is safe to assume that neolithic man was keener of sight and hearing and fleet of foot than is the present inhabitant of the centres of highest civilization. He surely, too, possessed greater powers of endurance.

The marvelous skill of the hand, which was developed by our ancestors, is being lost by their degenerate descendants, says this authority, who adds:

The simpler crafts are all disappearing. Spinning and weaving, for instance, have vanished, and with them have vanished the nimble sensitiveness of the hands of thousands of men and women. The knitting machine has destroyed the training for the hand supplied by the knitting needle. Embroidery has gone the same road. By the Heilmann embroidery machine one inartistic person can guide from 80 to 140 needles, working simultaneously. Lacemaking tells the same story; even the shoemaker, who is an artist in his way, has gone the same road.

The old craftsman may mourn the loss of his finished steel, but he must be proud to think that even in the making of the uppers of a boot it needs some 16 machines to do what

### Cheating the Doctor.

It isn't in every country that you can be cured of disease by passing through a round stone with a hole in it and then rolling in the grass. Such a practice is followed in Cornwall, Eng., although whether cures are effected is beyond the knowledge of the writer.

Cornwall is rich in early British antiquities and has many stone blocks, single and in straight lines, in circles, cromlechs and tumuli. It seems as if the country was at one time the playground of giants, who scattered the stones around as a child might the blocks with which it was amusing itself. Among these curiosities is the men-an-tol, or holed-stone, near Lanyon, which many of the Cornish people believe has curative qualities. Children afflicted with the King's evil, or with spine disease, are passed naked through the hole three times along the grass against the sun. Why the motion should be against the sun is not explained.

The holed stone is believed to have an astronomical origin. It is so arranged that the advent of May and August, February and November is indicated by the shadows cast through the aperture upon the stone on one side by those on the other.

### A Sacrificing Duchess.

The Dowager Duchess of Newcastle, one of the grand old dames of the English aristocracy and very wealthy, joined the Roman Catholic Church many years ago and then forsook the gay society of Queen Victoria's court to help along the poorer classes of East London. She passes most of her time at St. Anthony's in Whitechapel. This house stands next door to the Roman Catholic church of that name, but it is not her first abode in the East End, as once before she had a still smaller house in Great Regent street, a far worse neighborhood. The duchess, who was a very beautiful woman, gives most of her life to good works in the East End. Among much else, she carries on evening classes for young girls, where they are taught useful arts, such as cooking and dress-making. The Dowager Duchess lives the simple life by preference. Her food is of the plainest, and in her bedroom and sitting-room the walls are distempered, and the floors covered, not with carpet, but with matting or linoleum.

### Criticizing a Portrait.

Walter Dean once hired an artist to paint his portrait with the stipulation that the picture would not be accepted and paid for unless it looked like himself. When the portrait was completed it was sent to Mr. Dean, who did not recognize himself and absolutely refused to pay the painter. The painter sued, and Joe Strong, the artist, was called in to give an expert opinion.

"You see the portrait of Mr. Dean?" the lawyer asked. "No," said Mr. Strong, "I do not." "There it is," said the lawyer, pointing to the big canvas. "I don't call that a portrait. I call that a map of Mr. Dean," said Mr. Strong.

### Near at Hand.

A clergyman startled his congregation by informing them that it was his intention in a few days' time to go on a mission to the heathen. At the close of the service many prominent members crowded about him and expressed astonishment at this unexpected turn in his affairs and begged to know when he was going, where he was going and what they were going to do while he was gone.

"My good friends," said he, "to go on a mission to the heathen will not necessitate my leaving town. Ask yourselves whether that is not the case."

"And now I pronounce you, one and all, husband and wife!"

#### Umbrella on Horseback.

The late Duc de Sagan set many a fashion among French dandies, and among others that of wearing a single eyeglass with a very wide black ribbon—a practice followed for many years by Parisians who wished to look smart. In one respect, however, his most faithful admirers refused to follow the duke. This was when he took to carrying an umbrella on horseback. He first indulged in this eccentricity at a race meeting. When a shower came down and the leader of fashion was seen to be holding an umbrella over himself and his horse the sensation was immense. No one ventured to imitate him, however, and ultimately he abandoned the practice.—London Chronicle.

#### A Plucky Corporal.

A fine display of pluck and endurance was given the other day by Corporal Jack Hance, rough-rider, 54th, Battery, at present stationed at Piershill Barracks, Edinburgh. Exercising a young and spirited horse in the direction of Niddrie, the corporal met with an accident. His horse bolted, and before it had gone far, carried its rider against a farm cart, knocking the driver down. The soldier had his right leg broken below the knee, but kept in the saddle, and rode to Portobello Police Station, which is over a mile and a half away. There he explained matters, and tried to dismount but had to be helped to the ground by constables.

#### Neighborly.

"So you don't like that crowing rooster?"

"I haven't anything against the rooster personally. But every time he crows he reminds me that I don't like the people he belongs to."

## Prevent and Relieve Headache

"It gives me great pleasure to be able to refer to Dr. Miles' Anti-Pain Pills as the best remedy we have yet had in our house for the prevention and cure of headache. My wife who has been a constant sufferer for a number of years with above complaint joins me in the hope that they may fall into the hands of all sufferers."

JOHN BUSH,  
Waterville, Me.

#### Used Them Four Years.

"Dr. Miles' Anti-Pain Pills are the best I ever tried for the relief of headache. I have used them for nearly four years and they never fail to give me relief. I have tried many other remedies, but have never found any better."

JOSEPH FRANKOWICK,  
854 Trombly Av., Detroit, Mich.

There is no remedy that will more quickly relieve any form of headache than

#### Dr. Miles' Anti-Pain Pills.

The best feature of this remarkable remedy is the fact that it does not derange the stomach or leave any disagreeable after-effects.

Price 25c at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.

DR. MILES MEDICAL CO., Toronto,

shoemaker, who is an artist in his way, has gone the same road.

The old craftsman may mourn the loss of his finished steel, but he must be proud to think that even in the making of the uppers of a boot it needs some 16 machines to do what was done by his two hands. A great press now cuts out the sole piece; heavy rollers take the place of the lapstone. Eyelet holes are fashioned at the rate of 100 a minute. Button-holes are made and finished by one machine, while the buttons are fastened on by another. A final engine actually links together with a stitch the two boots of a finished pair. Here, then, as in the daintier art of glove-making, is there an irreparable loss in the use of the hands.

Needle-making used to be a fine handicraft, needing the deftest use of the fingers. Now needles are all made by machines.

With regard to pins, one machine provides them, complete with heads and points, at the rate of about 200 a minute. Wire enters the machine at one end and comes out as pins at the other. A still more ingenious apparatus sticks pins in formal rows into the paper. So here, again, there is no needs of hands.

So it is with everything else. In carpentry, machines have almost superhuman powers. Papermaking and bookbinding, as a means of hand culture, have practically ceased to exist. Wood engraving and line engraving have vanished, and with them have gone thousands of skilled artists.

Many other instances could be named in which intricate machinery has obviated the necessity of deft fingers, but enough have been mentioned to show that there are some facts on which to base the assertion that we are losing our skill.

## A NARROW ESCAPE.

### An Iceberg Comes Near to Sending a Ship to the Bottom.

The following happened to the steamer Portia, in Notre Dame bay: In clear daylight an iceberg was sighted and passengers and crew begged the captain to approach nearer in order that they might inspect and photograph it. The Portia therefore was steered close to the towering sides of the mighty berg, the highest of whose pinnacles glistened several hundred feet above the sea. Suddenly there was an explosion like the shock of a volcanic eruption and the great berg was riven asunder. One of the pieces split apart, became top-heavy and toppled over, its base, far under water, catching the Portia and lifting her high and dry some 10 or 12 feet out of the water.

The overturning of the berg created enormous swells, and these huge waves were the only thing that saved the ship from destruction. The weight of the ship, caught on its shelf of ice, kept the berg from turning a complete somersault, and a huge swell picked up the vessel and launched her again, stern first, in the sea. This sort of rough launching was not the kind a ship is used to, and the force carried her so far down into the water that the captain and crew never expected her to come up again. But she battled bravely for her equilibrium and finally righted herself and steamed away from the dangerous spot.

The whole mishap had taken only a few minutes, and before crew and passengers had time to do more than catch their breath they had been into the jaws of death and out again.

## Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her.—Mr. E. R. McBRIDE, Nipawin, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them; I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—MRS. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not offer to give them away and prepay them. If your baby is not well send for trial package. All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

# SAVED FROM THE KNIFE

## Appendicitis Cured By "Fruit-a-tives"

NEWBURGH, ONT., Feb. 12th, 1910.

"Just about a year ago, our daughter Ella, (fourteen years), was taken with terrible pains in the right side. The pain was so severe that we had to carry her to bed. We at once put her under the care of a first-class doctor, who pronounced it a case of Appendicitis and advised an operation.

We took her to a hospital in Kingston where she was again examined by an eminent specialist. He said she had Appendicitis and must be operated on at once if we wanted to save her life. As we had taken her to Kingston to have this done, we were ready, but our daughter was afraid and cried and begged so

pitifully, that we postponed it for that day. Luckily for us and for her an uncle came in with some 'Fruit-a-tives' and insisted on Ella taking them. Good results were apparent, almost from the first dose, and the continuous treatment cured her.

'Fruit-a-tives' saved our daughter from the surgeon's knife and to-day she is enjoying the best of health."

J. W. FOX, (Father).

LILLIAN FOX, (Mother).

Words cannot express the gratitude of Mr. and Mrs. Fox. And Miss Ella will always remember "Fruit-a-tives"—the discovery of an eminent physician, and the only medicine in the world made of fruit. 50c. a box, 6 for \$2.50, or trial box, 25c. At dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

### RAIN FORMATION.

Cold Air Squeezes the Moisture Out of Warm Air.

Warm air is capable of holding more moisture in suspension than is cold air. When by any means a layer or current of warm air which is saturated with moisture is suddenly cooled a portion of the vapor must fall as rain. Cold shrinks the heated air as pressure does a wet sponge and with precisely the same results. In mountainous countries this cooling down of the warm and damp air is most commonly produced by the air being brought into the neighborhood of mountain tops, which are cold.

It is for this reason that in such countries the showers mostly originate among the mountains and come through the valleys out upon the plains.

It will be easily understood that the higher the mountain the more striking will be the effects produced. If it be a snow capped peak in a tropical region a cloud will be formed such as to conceal the summit all the time. This cloud will be constantly growing on the side of the mountain toward which the currents of warm and moist air are set, for on that side the air is being cooled down, but after it has

been driven over the peak it will waste away as rapidly, for it is then coming in contact with warmer air again.

From such high peaks the cloud rarely breaks away as a shower. All the surplus moisture of the air is deposited in the form of rain or snow upon the peaks over which the air passes.

### A Massacre of Rats.

Seventy-nine rats is not a bad catch, especially when no effort has been made to capture them. Lately the boys on an Ayrshire farm amused themselves by throwing ears of corn into five old disused milk cans placed in an outhouse. The farmer himself had occasion to go into the outhouse two days later, and found each can alive with squealing rats. They had jumped into the cans to get the corn, and found it impossible to get out again. The cans were covered, rolled to a pond, and filled with water. This new and effective style of rat trap is now popular in the district.

### A Curious Funeral Ceremony.

It is said that when Alaric, the conqueror of Rome, died "a river was turned aside to make place in its bed for his grave and when he was buried the water was again let into its former channel and the prisoners who had helped to bury him were killed so that no one might find out where the conqueror of Rome was buried."

The river turned was the Busento and the place near Cosentino, Italy.

### THE SPEED OF NO RETURN.

Velocity a Body Must Have to Leave Earth and Never Come Back.

There are a great many odd terms in science none of which has a title so weird as the speed of no return. This means the velocity a body must have in leaving the earth in order for it never to come back. It has been accurately worked out and is found to be about seven miles a second. Now, though this speed has never been obtained by artificial means on the earth, still it is interesting to note the theory as regards the further actions of the body. It would continue outward in a curved line until it was controlled by balancing forces, mainly the earth, moon and sun, in such a way as to make it have an orbit of its own. So it would go on revolving forever just as any other planet.

Although this speed has never been obtained by artificial means, it is found in nature on the earth, and its application has a great deal to do with animal life on our planet. As is well known, it is a pet theory of the scientists that the earth is losing its atmosphere, just as the moon has already lost hers, on account of the wonderful vibrational speed of the molecules of a gas. Hydrogen gas is known to have a molecular velocity of over the necessary amount, and it is a startling proof of the theory that no free hydrogen is found in our atmosphere. The theory is that this gas on being set free rises on account of its lightness and when it gets to the outside edge of our ocean of air is left behind on one of its jumps, the earth going forward at a great rate itself, something like eight miles a second.

As the earth gradually lost its atmosphere it would become colder and colder on account of its inability to hold the heat received from the sun, and all animal and vegetable life would cease. This has already happened to the moon, its temperature never rising above zero, though the sun shines on it for two weeks at a time.

It is needless to say that even if this speed could be obtained by a cannon ball or other comparatively small body the friction with the air on its way would immediately burn it up, just as the shooting stars we see are burned up before reaching the earth. So if the visiting of the moon ever takes place it will have to be accompanied in a carriage with very thick sides and made of a material whose melting point is very high.—New York Tribune

### The Jellyfish.

The bay of Naples abounds in medusae, or jellyfish, often growing as large as two feet in diameter and weighing fifty and sixty pounds. Some of them shine at night with a greenish light and are known as noctiluca (night lanterns) by the natives. The jellyfish sometimes make migrations in great groups, sometimes so large and so thick as to impede the navigation of vessels, like the floating plants in the Sargasso sea of the tropics. These shoals of medusae, as they are called, may be so dense that a piece of timber plunged in among them will be held upright as if stuck in the mud, and ordinary rowboats cannot force their way through them. Their migrations have never been explained. They are irregular and occur at no particular season of the year and under no particular influences.

### The Record of Raindrops.

It is by carefully noting small and apparently insignificant things and

### A BROKEN ENGAGEMENT.

The Romance That Kept Charles Villiers Single All His Life.

Charles Villiers, long the "father of the house of commons," never married, but he was the hero of a romance which is described in the "Reminiscences and Correspondence of Mme. Olga Norikoff" as having lasted all his life.

Villiers was once on the eve of marrying a very rich spinster. The lady, however, was imprudent enough one day to say to her fiancé that she knew very well he only wanted to marry her money and not herself.

Villiers' aristocratic dignity manifested itself. He took his hat, bowed to the lady and said that after that remark there could be no more question of marriage between them. Off he went.

Strangely enough, the deserted spinster spent the next thirty years in trying in vain to see him to make up. He never came near her or gave her a chance of coming near him. "And do you know," remarked Lady Gilbert, who told me the story, "she still loves him and cherishes his memory."

"Oh, that is charming! Quite a romance!" I exclaimed. "Tell the lady to lunch with me tomorrow." We were acquainted. "Charles Villiers is coming."

Lady Gilbert delivered my message. The two old people met at my hotel, after which the lady humbly asked Charles Villiers to call on her. He accepted the invitation. When we were alone together she said: "Do you know, Mme. Norikoff, he is not in the least altered after all these years. He is exactly the same in looks and manners."

Of that, of course, I could have no opinion. But surely thirty years before the old Charles Villiers was neither half bent nor half blind. However, the old time friendship was renewed and lasted until the lady's death a few years later.

She left him the greatest part of her very great fortune. Charles Villiers became very rich in money, but unfortunately he was then very rich in years also.

### STALKED BY VULTURES.

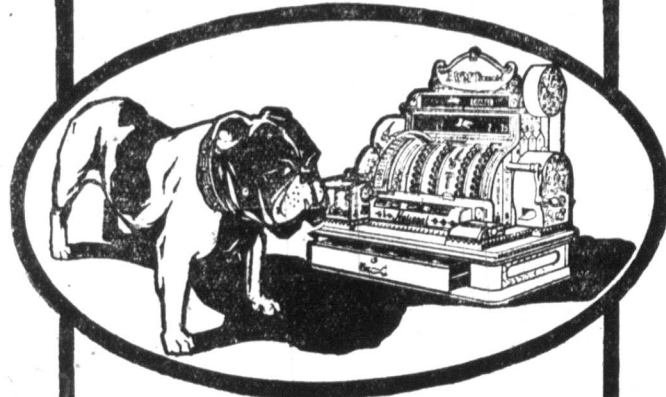

While a Man Trailed a Buck the Birds Followed the Man.

"I met with a curious and not altogether pleasant experience," writes an Anglo-Indian correspondent who has done a good deal of large and small game shooting in India, "when I was one day stalking a black buck. Between me and my quarry lay a large flat field of black cotton soil bordered by a very low, straggling and thin growing hedge of small babul trees. My only way to get a shot was to cross this, keeping the bushiest tree between me and the buck, which had not much to browse on and was therefore seldom motionless. I proceeded to do the hundred yards on the flat of my stomach. This on loose, hard baked black cotton soil was no joke. I pushed my rifle on ahead. Then, wriggling past it until the muzzle was near my knee, I would pass it on in front again, and so on.

"Progress was slow, and I was so absorbed that I failed to observe shadows crossing and recrossing my path and circling around until I had gone some fifty yards. Then the whirling of wings attracted my ears, and almost at the same moment a vulture landed on the ground not twenty yards away. I looked up. The air was alive with these repulsive looking birds. Then it flashed across me that

# JUST YOU GET A NATIONAL

particular season of the year and under no particular influences.

### The Record of Raindrops.

It is by carefully noting small and apparently insignificant things and facts that men of science are enabled to reach some of their most surprising and interesting conclusions. In many places the surface of rocks, which millions of years ago must have formed sandy or muddy seabaches, is found to be pitted with the impressions of raindrops. In England it has been noticed that in many cases the eastern sides of these depressions are the more deeply pitted, indicating that the raindrops which formed them were driven before a west wind. From this the conclusion is drawn that in the remote epoch when the pits were formed the majority of the storms in England came from the west, just as they do today.—Harper's Weekly.

### A Tree In a Thunderstorm.

Every one is aware that it is not wise to seek a tree's shelter in a thunderstorm, but if you must take refuge there then climb to the topmost branches. It has been proved that the upper boughs of trees during a storm would be the safest position, and it is said that birds in the branches are seldom killed. When the tree is struck by lightning it is the trunk which, presumably from its greater dryness, is a bad conductor and which therefore suffers the most.

### Very Like a Bull.

An Irish litterateur when eating an apple pie flavored with a few green gooseberries exclaimed with gusto, "Ah, what a delicious apple pie it would be if it was all made of green gooseberries!"

of wings attracted my ears, and almost at the same moment a vulture landed on the ground not twenty yards away. I looked up. The air, was alive with these repulsive looking birds. Then it flashed across me that I was being stalked! Doubtless these birds were attracted by my extraordinary method of procedure and mistook me for a wounded or dying man making a final effort to reach some shady spot. This was especially possible, as the experience occurred in a famine district where deaths by the wayside were not infrequent. By looking up I had evidently shown myself to the buck, for he was now off at full tilt. I therefore took pot shot at the vulture at twenty yards, but did not allow for the sighting sufficiently and missed him. The thought of being waited for by a flock of vultures while very much alive and well was, to say the least, uncanny."—Pall Mall Gazette.

### The Bird's Tail.

In his "Story of the Birds" James Newton Baskett says: To a slight extent in some birds the tail may be used as a rudder, but where the wing is perfected turning is effected with a very scant tail. The use of the tail always has more reference to the up and down movements than to the lateral. It comes into play in alighting (as a brake) or in rising (as a kitleike surface) and is used dexterously by the soaring birds in balancing themselves against varying currents of air.

### Self Help In Case of Fire.

As a house is never attacked by fire at the top and bottom at once, if there is a safe and ready exit at both top and bottom very little danger to life is to be feared. It is important that all exits should be so known as to be easily found by day or night by every inmate of the house. If the clothes you have on catch fire a blanket, rug or some such woollen article should be quickly and tightly wrapped around you. Air is thus excluded, and the fire goes out. A small fire in a room can often be put out in the same way in preference to pouring water on it. In case of fire keep all doors shut as far as possible. If a room is full of smoke keep low or crawl, because smoke and hot air both rise.

### A Touch of Sarcasm.

Mr. Skinfint (on receiving a deputation from his employees)—Well, what's the matter now?  
Clerk (spokesman)—We want to be paid every week instead of every month.  
"Ugh! You get all that's due to you, don't you?"  
"Yes, sir."  
"And promptly to a day?"  
"Yes, sir."  
"Then why do you want to be paid weekly instead of monthly?"  
"Please, sir, it's so we won't be gettin' the lumbago carryin' home our wages."—London Answers.

### In Sympathy.

The two men had met at a dinner party and were talking in a corner by themselves.  
"You see that tall woman with the sharp nose and the critical eye?" asked one of them.  
"Yes," said the other quietly.  
"Well, I've watched her for quite awhile. She's always got her nose in to somebody's business. She's the last woman I'd marry."  
"Which shows how strangely in sympathy we are," said the other without resentment. "She's the last woman I did marry."

## A New style Gas range

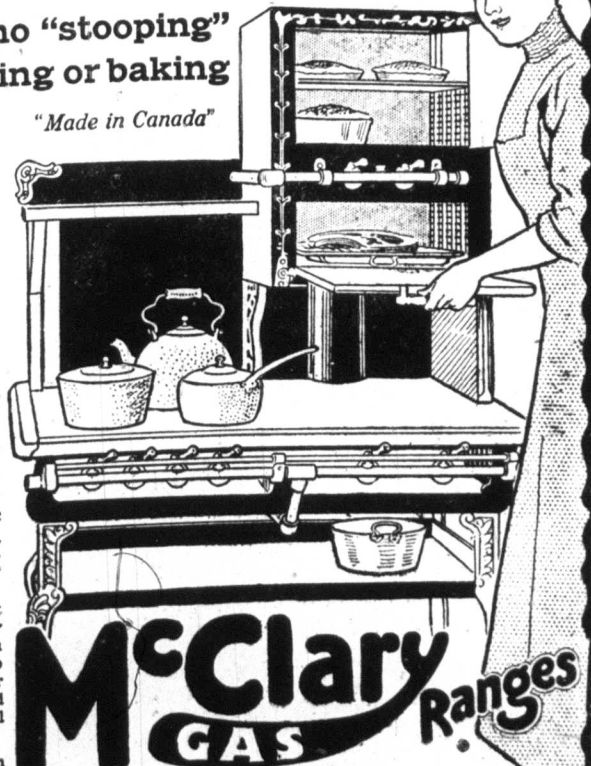

Double cooking top; no "stooping" necessary while cooking or baking

Model H is a new 1910 style of gas range. It will soon achieve great popularity. With Model H you can cook a meal with the greatest ease and convenience. You will never be crowded for room. The cooking top is double size—equal to eight burners and a simmering burner. And just note the convenient location of the baking and broiler ovens. No "stooping" is necessary when putting in or taking out pies, cakes, steaks, etc.

The broiler and drip pans are smoothly coated with white enamel. You can wash and clean them as thoroughly as you can an enamelled sauce pan. You can change the oven from a circulating to a direct action oven by simply moving a slide.

Be sure and see Model H at the nearest McClary agency. Also look at the other seven styles of McClary Gas Ranges. Each style can be supplied with or without two burner extension, oven thermometer, water heater, reservoir, high shelf, high closet and canopy top. Can be changed from artificial to natural gas in a few minutes.

McClary Gas Ranges are up-to-date in every particular. Your money cannot buy bigger value.

## HARD ON CATTLE

### Many Cases of Milk Fever in This District.

Milk fever, or as it is known in the medical profession, parturient paresis, is prevalent among the cattle within a radius of about twenty miles of Kingston, and as a result, the veterinary surgeons have been working overtime on the cases.

Dr. G. W. Bell, was asked concerning the matter and he stated that there were a great many cases, the loss of fine milk cows through this disease, amounting to as high as \$1,000 in one week. He pointed out that this disease only attacked the best cows, and as a result, this had made the loss very heavy. The disease is practically the same as apoplexy, and is brought on by the cattle eating lots of fresh grass in the spring, when they are in a very healthy condition.

When they are attacked with this disease, which is causing so much trouble, the animals act just like a drunken man, staggering all over the field. They afterwards fall down, and cannot get up. It is pointed out that the best way for them to be treated is that they be kept sitting up, and not allow them to stay flat upon the ground. They should be kept in this position until the arrival of a veterinary surgeon. It is also pointed out, that they should by no means, be given salts or physics of any kind. When taken with the disease, their throats become paralyzed and if anything of this kind is given them just at this time, it would cause their death. Just the other day, he was called to attend a horse which had been taken down sick with this disease and owned by David Rankin, miller, at Collin's Bay. Inside of fifty minutes, the doctor was on the case and while he was there, he received another call, this time, to the farm of Mr. Taylor, who runs a cheese factory at Latimer. One of his horses had been stricken with the much dreaded disease. Inside of a couple of hours, both these horses were well. It is a disease which can be cured if prompt action is taken and the best methods are used.

### Mr. Jessop Has a Preparation That Will Grow Hair Abundantly.

This is an age of new discoveries. To grow hair after it has fallen out today is a reality.

Salvia, the Great Hair Tonic and Dressing, will positively create a new growth of hair.

If you want to have a beautiful head of hair, free from Dandruff, use Salvia once a day and watch the results.

Salvia is guaranteed to stop falling hair and restore the hair to its natural color. The greatest Hair Vigor known.

Salvia is compounded by expert chemists.

Watch your hair if it is falling out. If you don't you will sooner or later be bald.

Salvia prevents baldness by fastening the hair to the roots.

Ladies will find Salvia just the Hair Dressing they are looking for. It makes the hair soft and fluffy and is not sticky. A large bottle, 50c.

#### DAIRY COW QUERIES.

What is the object in keeping a cow? Is it simply to consume the crops grown in the fields?

Is it to supply home made fertilizer for the farm?

Is it to give the hired man another chore?

Is it not rather To produce plenty of good milk?

To be of real service to mankind by

## TOWN COUNCIL

Council Chamber,  
May 30th, 1910.

An adjourned meeting of the town council was held on Monday evening, Mayor T. W. Simpson presiding. Present—Reeve Alexander and Councillors Meng, Waller, Kimmerly, Hawley, Steacy.

A communication was read from H. B. Sherwood, Superintendent of the Bay of Quinte Railway, making application for a six foot granolithic walk from the line of right of way of G. T. Ry., on Centre street, south to the south side of their property on the usual conditions. Mr. Sherwood thinks this walk is a public accommodation and much needed improvement, especially so in view of the building of a new station and freight shed by the Bay of Quinte Railway.

Referred to the Streets Committee to report.

Councillor Osborne entered.

In view of the several petitions before the council for sewers the advisability of proceeding with the necessary formalities for the construction of a trunk sewer on Dundas street occupied the attention of the council and a considerable portion of the evening was taken up in discussing the question.

Mayor Simpson urged that the question be taken in hand and dealt with immediately. He felt perfectly satisfied that the present council was quite capable of handling the question, and expressed the opinion that the construction of a trunk sewer was a much needed necessity and was the starting point of a systematic plan for the proper sewerage of the whole town. Heretofore small sections of sewers had been constructed in several localities without any idea of their conforming to a general sewage system but rather to remedy an existing evil, and furnish relief locally. He suggested that all the necessary facts and figures be secured, a by-law drafted, and submitted to the ratepayers for their approval at the earliest possible convenience, and if assented to by the property holders that the work of construction be proceeded with at once. The necessary funds for the work could be provided by issuing debentures. The different members of the council all seemed to agree with the Mayor, particularly so as to the necessity of the trunk sewer.

W. S. Herrington, K. C., town solicitor, was present and handed out some good advice as in reference to the construction of sewers also as to the workings of a local improvement by-law.

Moved by Coun. Meng, seconded by Councillor Kimmerly, that the Streets Committee be empowered to employ a competent civil engineer to furnish plans, specifications and estimates of the cost of a trunk sewer on Dundas street, also plans and specifications for sewers asked for on Dundas, John Bridge and Adelphi streets.

Councillor Osborne stated he would like to support the motion, but thought the engineer's opinion should be secured on the advisability of constructing the sewer from the eastern end of Dundas street to John street, then south to Mill street and west on Mill to connect with the West street sewer. He was of the opinion that if this route was feasible it would be cheaper and would serve a greater purpose.

Moved in amendment by Coun. Osborne, seconded by Councillor Hawley that the Streets Committee be empowered to employ a competent civil engineer to furnish plans, specifications and estimates of cost of trunk sewer on Dundas street to John street, south to Mill and west to West street, be furnished.

The amendment carried on the following division:

Yeas—Alexander, Hawley, Osborne, Simpson, Steacy—5.

Nays—Kimmerly, Meng, Waller—3. Rev. F. T. Dibb addressed the council.

## PERUNA A WONDERFUL BOON IN MY OLD AGE.

MRS. MAHALA REID.

Heartily Approves of Peruna and Man-a-lin for Kidney and Bowel Trouble

MRS. MAHALA REID, Corbyville, Ont., Canada, writes:

"Your celebrated remedies have been a wonderful boon to me in my old age.

"I have not been in so good health for several years as now. I was troubled with constipation, rheumatism and kidney trouble.

"A little over two years ago, I completely lost my health, becoming almost helpless, when a dear friend sent me your remedies, Peruna and Manalin. I began to take them, following the directions on the bottle. I very soon began to feel benefited by their use and continued to take them.

"I am now completely recovered from the above ailments, in fact, better than I have been for years past. I cannot praise the remedies too highly and will always recommend them to others."

Constipation is almost sure to set up other derangements.

Retained accumulations within the bowels are partly reabsorbed into the system, producing sometimes rheumatism, sometimes kidney trouble.

The blood being surcharged with acids, which ordinarily find their escape through the bowels when they are regular, rheumatism is the result.

Acid blood forms crystals, which accumulate about the ligaments, cartilages and sometimes the bones in the joints.

Such morbid accumulations of blood throw extra work upon the kidneys. The kidneys being unable to perform the unusual labor of excreting these poisons, often give way and kidney trouble is the result.

Permanent relief cannot be reasonably expected except by correcting the constipation.

Regular bowels are a great safeguard to health. Peruna and Manalin are unexcelled the world over for chronic diseases affecting the bowels and kidneys.

Mrs. W. W. Lamaster, 3127 McAtee, Ave., Louisville, Ky., writes:

"I suffered for twenty-six years with bladder and kidney trouble, and being advised to give Peruna a trial, I did so. Eight bottles of Peruna and three bottles of Manalin entirely cured me."

## RENTING A BRIDAL VEIL.

An Incident of a Fashionable Wedding in New York.

Not long ago one of the wealthiest "charge customers" of a well known department store in New York purchased a \$500 wedding veil for her daughter, which was charged to her account and duly delivered. The wedding was a large one and celebrated at high noon in one of the downtown churches.

It happened that one of the girls from a department store went out for luncheon at this hour and, seeing a fashionable wedding in full swing, slipped into the church with the crowd and into one of the back pews. After the ceremony was over she hurried back to her place behind the counter, too busy with her special sales to even think about it.

little pieces of rice and handed them to the manager.

She went back to her counter, and the "charge customer," whose accounts ranged in the thousands each year, was rendered a bill for "\$300 for the use of a bridal veil worn by her daughter."

A check for the \$300 was immediately sent, and the wealthy "charge customer" still continues to charge.—Chicago Record-Herald.

#### Fat Crystals.

If small quantities of butter, lard and beef fat be separately boiled and slowly cooled for, say, twenty-four hours, the resulting crystals will show very marked differences under the microscope. The normal butter crystal is large and globular. It polarizes brilliantly and shows a well marked St. Andrew's cross. That of lard shows a stellar form, while that of beef fat has a foliated appearance.

grown in the fields?  
Is it to supply home made fertilizer for the farm?  
Is it to give the hired man another chore?  
Is it not rather  
To produce plenty of good milk?  
To be of real service to mankind by converting feed that he cannot use into nourishing, appetizing food?  
While being kept for this purpose does she earn a profit?  
Does she pay for her keep?  
Would you be better off if you sold the feed instead of keeping some of the cows that you now have making a pretence of using it profitably?  
Does each one of your cows produce milk at a cheaper rate per hundred pounds than the factory pays?  
Does each cow in your herd produce milk or butterfat at a good profit above the cost of feed?  
Do you think so or just make a guess at it, or do you know for certain?  
How else is your labor to be paid for?  
Do you keep records so as to find out these things, or are you content to keep few a poor cows in a behind-the-times style?  
Men, who used to get only 3,500 lbs. of milk and 133 lbs. fat per cow, are now getting 4,900 lbs. milk and 186 lbs. fat, since beginning to keep records.  
Would you not be glad to obtain a similar increase of over 40 per cent. Then keep records.

## VESTAL VIRGINS.

### They Kept the Sacred Fires Alight In Ancient Rome.

Ovid tells us that the first temple of Vesta at Rome was constructed of wattle walls and roofed with thatch, like the primitive huts of the inhabitants. It was little other than a circular covered fireplace and was tended by the unmarried girls of the community. It served as the public hearth of Rome, and on it glowed, unextinguished throughout the year, the sacred fire which was supposed to have been brought from Troy and the continuance of which was thought to be linked with the fortunes of the city.

The name Vesta is believed to be derived from the same root as the Sanskrit was, which means "to dwell, to inhabit," and shows that she was the goddess of home, and home had the hearth as its focus. A town, a state, is but a large family, and what the domestic hearth was to the house the temple of the perpetual fire became to the city. Every town had its vesta, or common hearth, and the colonies derived their fire from the mother hearth.

Should a vestal maiden allow the sacred fire to become extinguished she was beaten till her blood flowed, and the new fire was solemnly rekindled by rubbing together of dry wood or by focusing of sun's rays. The circular form and domed roof of the temple of Vesta were survivals of the prehistoric huts of the aborigines, which were invariably round.

# Zam Buk

is the best remedy known for sunburn, heat rashes, eczema, sore feet, stings and blisters. A skin food!

All Druggists and Stores—50c.

to John street, south to Mill and west to West street, be furnished.

The amendment carried on the following division:

Yeas—Alexander, Hawley, Osborne, Simpson, Steacy—5.

Nays—Kimmerly, Meng, Waller—3. Rev. F. T. Dibb addressed the council in reference to the town sharing a portion of the costs of the burial of the late Mrs. Chas. Smith. He asked that the town grant the sum of \$12.

The reverend gentleman was given to understand that if the undertakers presented a bill to the council not exceeding \$12 the account would be paid.

On motion of Councillors Waller and Meng the solicitor will be asked to prepare a Local Improvement By-Law.

A by-law authorizing the building of a cement walk in the south side of Dundas street, between Centre and Robert streets was passed.

A by-law to regulate the making of excavations on the streets of Napanee was passed.

Parties who propose making excavations on the streets in the future will do well to enquire of the superintendent of Streets Committee before beginning the work.

A by-law was passed appointing Frank H. Perry, collector of taxes for 1910, at a salary of \$200, and a sum not exceeding \$10 for postage.

On motion of Councillor Meng and Reeve Alexander the Streets Committee were empowered to have all trees in the town trimmed, where it is deemed necessary.

Moved by Coun. Kimmerly, seconded by Reeve Alexander, that C. A. Anderson's offer of \$8 per month for rent for the town's property since the time it was partially destroyed by fire, be accepted. Carried.

The Fire Water and Light Committee were empowered to purchase 11 ft. of suction hose for the fire engine, one dozen spanners, and a gong for the hose wagon.

Council adjourned.

## FOR FALLING HAIR

You Run No Risk When You Use This Remedy.

We promise you that, if your hair is falling out, and you have not let it go too far, you can repair the damage already done by using Rexall "93" Hair Tonic, with persistency and regularity, for a reasonable length of time. It is a scientific, cleansing, antiseptic, germicidal preparation, that destroys microbes, stimulates good circulation around the hair roots, promotes hair nourishment, removes dandruff and restores hair health. It is as pleasant to use as pure water and it is delicately perfumed. It is a real toilet necessity.

We want you to try Rexall "93" Hair Tonic with our promise that it will cost you nothing unless you are perfectly satisfied with its use. It comes in two sizes, prices, 50c. and \$1.00. Remember, you can obtain Rexall Remedies in this community only at our store—The Rexall Store, T. B. Wallace.

Elihu Yale, from whom the college in New Haven took its name, sleeps in the graveyard at Wrexham church, near Chester, England. The following inscription (restored some years ago by the council of Yale) is to be found on one side of his tombstone:

Born in America, in Europe bred, in Africa traveled, in Asia wed. Where long he lived and thrived; in London dead.

Much good, some ill, he did, so hope all's even And that his soul through mercy's gate to heaven.

—Boston Globe.

### In a Bad Way.

A teacher in an elementary school at Graz, Austria, received a letter from a mother who explained that she had been dangerously ill with rheumatism and had kept her little girl at home to nurse her.

slipped into the church with full swing, and into one of the back pews. After the ceremony was over she hurried back to her place behind the counter, too busy with her special sales to even think about it.

The next morning, however, when she read an account of the "magnificent wedding in — church and a detailed description of the wonderful veil worn by the bride, valued at \$500," she laughingly told her numerous friends in that department that she "had been one of the honored guests and had seen that \$500 veil with her own eyes." Just at this thrilling point of her story one of the floor men stepped up to her and said:

"You are wanted at the manager's office, Miss B."

As she entered the office, to her perfect amazement, she beheld the identical bridal veil just under discussion.

"Miss B., can you tell me if you ever saw this veil before?" asked the manager.

"Yes, sir; I saw it yesterday."

"Where did you see it?"

She took from her pocket the clipping from the morning newspaper with the account of the great wedding, the costly veil and a picture of the bride. Laying it upon the desk, she said:

"This is a picture of the veil."

"How did you happen to be at this wedding instead of in your place here in the store?"

"It was my luncheon hour, and I went to the wedding instead of to lunch."

The manager smiled.

"Can you positively identify this veil as the one you saw yesterday?"

Miss B. took it up in her hands and, unfolding it, ran her fingers through the mesh and into the tiny folds where the orange blossoms were caught, then with some difficulty picked out three

hours, the resulting crystals will show very marked differences under the microscope. The normal butter crystal is large and globular. It polarizes brilliantly and shows a well marked St. Andrew's cross. That of lard shows a stellar form, while that of beef fat has a foliated appearance. In course of time, as the butter loses its freshness, the globular crystal degenerates and gradually merges into peculiar rosette-like forms.

### Big Football Receipts.

The second meeting of Barnsley and Everton in the English Cup Semi-Final yielded \$12,500 gate-money.

### To Wash It Out.

"Yes," said the aristocrat, "I was indignant, and I wrote him that the clan lost the marriage of our son to his daughter was a blot on the family escutcheon, and his only reply was to send me an advertisement of a new brand of soap he is putting out."

Trade **Asaya-Neurall** Mark

THE NEW REMEDY FOR **Nervous Exhaustion**

Grief and worry drain the nervous system with disheartening rapidity. The signs are lack of interest, lack of appetite, insomnia. The only remedy is Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite, aids digestion, restores nerve vitality. \$1.50 per bottle. Obtain from the local agent.

E. E. JESSOP.

## VARICOSE VEINS CURED

NO NAMES USED WITHOUT WRITTEN CONSENT.

Confined to His Home for Weeks.

"Heavy work, severe straining and evil habits in youth brought on Varicose Veins. When I worked hard the aching would become severe and I was often laid up for a week at a time. My family physician told me an operation was my only hope—but I dreaded it. I tried several specialists, but soon found out all they wanted was my money. I commenced to look upon all doctors as little better than rogues. One day my boss asked me why I was off work so much and I told him my condition. He advised me to consult Mrs. Kennedy & Kennedy, as he had taken treatment from them himself and knew they were square and skillful. I wrote them and got The New Method Treatment. My progress was somewhat slow and during the first month's treatment I was somewhat discouraged. However, I continued treatment for three months longer and was rewarded with a complete cure. I could only earn \$12 a week in a machine shop before treatment, now I am earning \$24 and never lose a day. I wish all sufferers knew of your valuable treatment."

HENRY C. LOCUST.

### HAS YOUR BLOOD BEEN DISEASED?

BLOOD POISONS are the most prevalent and most serious diseases. They sap the very life blood of the victim and unless entirely eradicated from the system will cause serious complications. Beware of Mercury. It may suppress the symptoms—but THE NEW METHOD cures all blood diseases.

YOUNG OR MIDDLE AGED MEN.—Imprudent acts or later excesses have broken down your system. You feel the symptoms creeping over you. Mentally, physically and vitally you are not the man you used to be or should be. Will you heed the danger signals? **READER** Are you a victim? Have you lost hope? Are you hesitating to marry? Has your blood been diseased? Have you any children? Our New Method Treatment will cure you. What it has done for others it will do for you. Consultation Free. No matter who has treated you, write for an honest opinion Free of Charge. Books Free—"Boyhood, Manhood, Fatherhood." (Illustrated) on Diseases of Men.

NO NAMES USED WITHOUT WRITTEN CONSENT. PRIVATE. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.

## Drs. KENNEDY & KENNEDY

Cor. Michigan Ave. and Griswold St., Detroit, Mich.

**NOTICE** All letters from Canada must be addressed to our Canadian Correspondence Department in Windsor, Ont. If you desire to see us personally call at our Medical Institute in Detroit as we see and treat no patients in our Windsor offices which are for Correspondence and Laboratory for Canadian business only. Address all letters as follows:

**DRS. KENNEDY & KENNEDY, Windsor, Ont.**

Write for our private address.

Two remarkable edicts have been issued within the last few days by the imperial government of China. One reaffirms the pledge to grant a constitution and establish parliamentary government and at the same time summons a national assembly—whose functions are not defined—for October. The other restricts or abolishes certain forms of domestic slavery in the empire. This is better news than the kind we were getting a few weeks ago—news of rioting, anti-foreign agitation, destruction of missions. Exactly what prompted the issuance of the reform edicts is not made clear in the dispatches, but that they have some significance is hardly to be doubted.

We must expect not only "compromise" but lapses and setbacks in Chinese politics, but the spirit of modernity is working and progress is inevitable. The plan of the late empress, which so puzzled the West, for the gradual introduction of parliamentary government in a period of twelve years, is being adhered to, and certain of the promised steps have been taken. The provincial assemblies have paved the way for the national assembly, and the details of the edict in regard to the latter will be awaited with interest.

Cloud weather forecasts made by Dr. A. de Quervain of Zurich are of the utmost scientific and practical importance. His deductions are based on the familiar cumulus cloud of warm summer days. When reaching heights of six or seven miles it becomes a trundle cloud. The high floating top assumes the shape of a fleecy ice needle cloud and extends sideways in anvil shape. The ordinary cumulus cloud undergoes similar transformations at a level of three to four miles, and so does not lead to the formation of thunder storms but merely to the production of fleecy clouds.

This sort of cloud can be regarded as a presage of good weather. The veil-shaped hooded clouds have not been sufficiently explained. Often they encompass the top of a quickly rising cumulus cloud, and until recently were thought to be instrumental in the production of hail. They are always found to be intimately connected with existing fleecy clouds, and on the other hand presages bad weather, occurring previous to thunder storms.

Even such reliable presages of thunder storms are the remarkably delicate varieties of fleecy clouds which are mostly found floating about four miles high. On a darker layer there are superposed delicate white heads. These lofty

## HOME.

### RHUBARB.

**Spiced Rhubarb.**—Sprinkle two and one-half pounds of sliced rhubarb with one pound of sugar and let stand over night. Drain in the morning and add to the juice one cupful of water, one cupful of sugar and one-half cupful of cider vinegar. Put on to boil with a spice bag containing one-half teaspoonful each of cloves, mace, allspice, ginger and cinnamon. Boil until it forms a nice syrup, then add rhubarb and boil until thick.

**Rhubarb Jelly.**—Cut stalks of rhubarb in small pieces, leaving the skins on, and throwing away all the green upper ends. Stew down well with a little water at first to prevent burning. Strain through a muslin bag, add white sugar, pound for pound. Boil twenty minutes.

**Rhubarb Pie.**—Make a good rich pie paste and do not roll out very thin, to three cupfuls of finely cut rhubarb, add one and a half cupfuls sugar, lots of butter, and sift a little flour on the top; wet top crust with milk, press edge of pie down well; then take a strip of cotton two inches wide and long enough to go around the edge of pie and tie it; wet cotton in cold water not wringing it out before putting it on, this will prevent any of juice running out.

**New Pie Recipe.**—Cut stalks of rhubarb in one-half inch pieces. There should be one and one-half cups. Mix seven-eighths cups sugar, two tablespoonfuls of flour, and one egg slightly beaten. Add to rhubarb and bake between two crusts.

**Rhubarb Sherbet.**—Boil in three pints of water six or eight green stalks of rhubarb, four ounces of raisins and figs. When the water has boiled one-half hour strain and mix it with one teaspoonful of rose water and juices of one orange and lemon. Sweeten to taste. Drink cold.

**Apple and Rhubarb Jelly.**—Wash and slice ten stalks of rhubarb, cut and core three medium sized apples, then stew apples and rhubarb together. Hang up in a jelly bag. For every pint of juice take a pint of sugar. Boil till it jellies and pour into tumblers.

### CAKE.

**German Coffee Cake.**—One quart flour, one pint milk, one egg, two tablespoonfuls of sugar, one teaspoonful (rounding) salt, one-half cupful shortening (butter and lard) 1 cent's worth yeast. Set sponge in three-quarters cupful of water. Have the flour warm. Heat milk, beat milk, eggs, sugar to a foam and add other ingredients. When all is mixed well beat dough with hand for five minutes. Let rise until light. Put into pans about one-half inch deep and let rise again until light, when sprinkle with sugar and cinnamon and bits of butter, also any kind of chopped nut meats. Then bake. From this dough you can bake biscuits and herns.

**Devil's Food Cake.**—One heaping teaspoonful of butter, one cupful of granulated sugar; beat this

### USEFUL HINTS.

A glass of hot milk is often a cure for insomnia.

A flat file is one of the best things on which to sharpen bread and chopping knives.

Bread will keep better in a wooden box than in tin.

Paper bags are good to slip over the hand while blacking the stove.

Discarded felt hats are good to make felt soles for slippers and rubber boots.

When putting vegetables to cook in boiling water, use water that is freshly boiled.

A few shreds of candied orange peel will give a delicious flavor to a bread pudding.

If there is a little rice left over, it may be used to good advantage for thickening soup.

Do not put salt in the water in which peas are cooked, as it will cause the skins to crack.

When boiling fresh potatoes or peas, a sprig of mint in the water gives a delicious flavor.

If salt fish is required for immediate use, it will freshen much more quickly if soaked in milk instead of water. Sour milk will answer as well as sweet.

Never let a fine mirror stand in the sunlight, as the backing will soften and become clouded.

Ink stains on handkerchiefs and other cloths may often be soaked out in milk, but the sooner they are dealt with the better.

Use butter rather than milk if potatoes need extra thinning. The former makes them soggy, and nothing is worse than milky mashed potatoes.

Eggs that are fresh have dull shells. If you wish to keep a new-laid egg fresh, rub it over with oil or pure glycerine.

Flower vases stained with flower water can be perfectly cleaned with tea leaves moistened with vinegar.

Delicate china may be washed in warm water to which a little fuller's earth has been added instead of soap.

Saucepans should never be allowed to get crusty with soot on the outside. Not only is a dirty saucepan of this kind unsightly, but it does not heat nearly as quickly as a clean one.

To lengthen the life of pillowslips—Directly they begin to wear, rip open the bottom seam and sew up again, putting what was originally back and front to the sides. When making the beds be sure the seam is on the underside of the pillow.

Paraffin stain on wall paper may be eradicated by covering the spots thickly with French chalk. Then hold a clean piece of blotting paper over, and pass a warm iron over it. Do this several times till the mark disappears.

There is danger of giving house plants too much rather than too little water in winter.

The unpleasant odor that clings to the hands after handling onions, fish, or the like may be overcome by rubbing dry mustard over them or putting the hands into water containing mustard.

For iron rust, soak the stain with lemon juice, sprinkle with salt, and bleach for several hours in the sun.

Rub machine oil stains with lard, let stand several hours, then rinse in soapy water.

For a scorch, wet the spot, rub with soap, and bleach in the sun. Never iron a bedspread while it is damp. Fold in the same manner

## BUSY LIFE OF THE KING

### MANY TASKS DONE BY THE LATE KING EDWARD.

He Was Always a Brief Speaker, But Could be Happy in His Oratory.

The task of being either King of England or Prince of Wales is no easy one, and the late King Edward always had a great deal to do and to look after. There are many things which he could not do, as either the Heir Apparent or the Monarch is looked upon as a man who should devote most of his attention to being an ornament to society. This was fortunate for King Edward in his young days, as he was thus saved from being overloaded with work.

When King Edward undertook any task, no one worked harder than he. In 1893 he became a member of the Commission for the Housing of the Poor, and he attended every meeting of the commission and made no attempt to shirk a y of the unattractive duties which the commission sometimes involved. He visited some of the poorest slums of London, and investigated for himself the condition of the people at the very bottom of the social scale. Then he urged the gravity of the problem before the House of Lords. On one occasion when speaking of the subject he said: "The subject of the housing of the poor is not entirely unknown to me, as having acquired a property in Norfolk twenty years ago, I have had something to do with the building of fresh dwellings for the poor and the working classes. On arriving there I found the dwellings in the most deplorable condition, and I hope now that there is not one on my estate who can complain of not being adequately housed." From these words it will be gathered that the King was also a hard working and

### MODEL LANDLORD.

If this side of his character was not better known, it was the fault of the position which the British constitution forced him to occupy. At one time he expressed his anxiety to serve on a labor commission, but politics would not permit, so the nation lost the services of a man who might have given splendid advice and assistance.

Two movements for which King Edward may claim the credit were those which ended in the establishment of the Royal College of Music and the Imperial Institute. The former has fully vindicated the hope of the King that it would diffuse the love of music among the English people. He was also most active in bringing into existence the Imperial Institute, with the object of helping the people of the homeland to understand the Empire.

Besides interesting himself in the exhibitions on the Continent, King Edward has also been the main-spring of those held in his own land. He aided them not only with his sympathy, but also his practical support. Then a great deal of his time was filled with public ceremonies, such as the opening of exhibitions, the unveiling of statues, the laying of corner-stones and the

Even such reliable présages of thunder storms are the remarkably delicate varieties of fleecy clouds which are mostly found floating about four miles high. On a dark layer there are superposed delicate white heads. These lofty curly heads, generally in the morning, safely predict a thunder storm within twenty-four hours. By balloon ascents it was found that the occurrence of these clouds coincides with a violent drop in the temperature.

Fiction, says an English novelist of note in a literary periodical, has reached a curious and unhealthy stage; is it preparing for revolution? Will the novel decline and disappear as an art form, or will it, on the contrary, reveal new vitality? All things undergo change, and the modern novel must adapt itself to conditions and influences that are very different from those which prevailed twenty years ago. The novelist's questions are suggested by the kind of fiction demanded by the cheap magazines and by the great reading public. He is disposed to be pessimistic. The output of fiction is too heavy; critics are weary and indifferent; bad work, if sensational and piquant, gets itself advertised; the quiet, dignified artist is not at all sure of recognition, for he may be overlooked or dismissed with a few stereotyped expressions.

On the other hand, the novelist admits, fiction has shown remarkable fecundity and staying power, and has won a spacious and generous freedom. "If a man has it in him to write great truths concerning human nature he has the liberty to do so now." We may add that the novelist now reaches thousands where formerly he reached hundreds, so that his opportunities are as wide as his liberty. There is, furthermore, no prejudice against any type of novel; it may be romantic, realistic, psychological, fantastic, political, satirical; so long as it is interesting and reasonably well constructed it will receive praise and find readers galore.

Now, do not the advantages of the modern novelist outweigh his disadvantages? Is not the danger of "the vast harvests of the printing press" to serious and sincere work largely theoretical? The best novels are not necessarily the best sellers, but how many really good novels fall of proper recognition in any year. Will the severest critic of contemporary tendencies in publishing, reviewing and reading name five novels that, during a period of ten years, say, have been unfairly condemned to neglect and obscurity? Too many novels are written, but the poor ones live only a month or two and are forgotten. Good literary work has a better chance than ever before, as "new" novelists like De Mille and Arnold Bennett will readily admit.

with sugar and cinnamon and bits of butter, also any kind of chopped nut meats. Then bake. From this dough you can bake biscuits and horns.

Devil's Food Cake.—One heaping teaspoonful of butter, one cupful of granulated sugar; beat this to a good cream, then add yolks of two eggs. Cut up one-fourth of a large bar of bitter chocolate, put into saucepan, add one-half cupful of water, and let come to a boil, then pour over the above contents. Next add one and one-half scant cupfuls of flour with one teaspoonful of baking powder; lastly add one-half scant teaspoonful of soda to one-half cupful of boiling water and add to the above. The secret of this cake is to have the batter thin. You will find this delicious and cheap.

#### SEASONABLE RECIPES.

Almond and Celery Salad.—One pint of celery cut fine, one small cupful of almonds blanched and halved. Cover with mayonnaise dressing.

Chicken Salad.—One cupful of cold boiled chicken, one pint of celery cut into cubes, one cupful of English walnuts blanched and broken into small pieces, one tablespoonful of parsley chopped fine. Cover with salad dressing and serve on shredded lettuce.

Quick Orange Marmalade.—Take one-third lemons and two-third oranges—eight oranges and four lemons make a large enough quantity to cook at one time and make twelve glasses. Take off the yellow part of the peel from one-half of each, cut into small pieces and drop into the preserve kettle. Take off the white part of the peel between the yellow part and the pulp; allow none of it to go into the marmalade, as it makes it bitter. Slice the fruit across in thin slices and add it to the cut up peel. Add a teaspoon of water for each whole fruit (orange or lemon) and cook until the fruit is soft. When cooked add three-quarters cup of sugar for each whole fruit and boil hard until it jells. The quicker it is cooked the better, as long cooking, especially after the sugar is added, tends to destroy the flavor and makes it taste strong. This is delicious.

Strawberry Fritters.—Take one pound of large, but not overripe, strawberries with the stems on, put them in a basin and sprinkle a little ground cinnamon over them. Dissolve some peach or apricot marmalade or jam, using either grape juice or a small glass of liquor if you have it. Strain it and keep it warm. Have ready a small quantity of batter, such as you usually use for fritters, dip the strawberries into the marmalade, roll them in powdered sponge cake, then dip each one in the batter and drop them gently into boiling clarified butter and fry them until crisp and of a nice, light brown color. Fruit fritters may be made by using any desired fruit. Peel oranges and use the sections. Apples may be peeled, quartered, and cut into eights. Peaches, plums, or pears may be used in the same way. Dip the sections of fruit in the following batter: Sift one and one-third cups of flour with two teaspoonfuls of baking powder and one-fourth of a teaspoonful of salt. Add one cup of milk and two eggs, well beaten; sugar to taste. Use more flour if the batter is too thin.

salt, and bleach for several hours in the sun.

Rub machine oil stains with lard, let stand several hours, then rinse in soapy water.

For a scorch, wet the spot, rub with soap, and bleach in the sun. Never iron a bedspread while still damp; fold in the same manner when bought, press smooth with the hands, wrap up in newspaper, and put it up on a radiator to dry.

The water in which potatoes have been boiled is excellent for removing stains from silver articles. Wash the silver well in the water, rinse, wipe dry, and polish with soft cloth.

Old string can be knitted for a wash cloth, crocheted in short lengths for a dish mop, used again for wrapping purposes, and is the best thing ever to use to sew buttons on children's white garments.

Old newspapers give a polish to lamp chimneys; are excellent to wipe the sink out with; to use under a carpet in place of the regular carpet paper; to lay over the bread if it browns too fast when baking; to roll dishes in on moving day.

A baker says that a cupful of liquid yeast is equivalent to half a compressed yeast cake, or whole dry yeast cake.

If one needs a door stop and there is not one at hand, a large spool, nailed in position, will answer every purpose.

To remove odor of fish or onions from the frying pan, put in vinegar and heat until scalding, and then wash out.

For creaming butter or butter and sugar, a perforated spoon will be found more convenient than a fork or the hand.

#### WEAK SPOT IN HIS DEFENCE.

A religious worker was visiting a Southern penitentiary, when one prisoner in some way took his fancy. This prisoner was a negro, who evinced a religious fervor as deep as it was gratifying to the caller.

"Of what were you accused?" the prisoner was asked.

"Dey says I took a watch," answered the negro. "I made a good fight. I had a dandy lawyer, an' he done proved an alibi wif ten witnesses. Den my lawyer he shore made a strong speech to de jury. Put it wa'n't no use, sar; I gets ten years."

"I don't see why you were not acquitted," said the religious worker.

"Well, sah," explained the prisoner, "dere was shore one weak pint 'bout my defence—dey found de watch in my pocket."

#### COULDN'T BE DONE.

A man of hesitating demeanor entered the general store, and glanced about him in the manner of one who knew what he wanted, but could not see it.

"Yes, sir?" said the assistant. "You keep all kinds of felt goods here, don't you?" asked the customer.

"Yes, sir; everything made in felt, from casement-packing to hats."

"Well, I'm afraid you haven't got what I'm looking for."

"If it's made of felt, sir, I'm sure we have."

"Well, then," said the customer, "let me have a long-felt want."

spring of those held in his own land. He aided them not only with his sympathy, but also his practical support. Then a great deal of his time was filled with public ceremonies, such as the opening of exhibitions, the unveiling of statues, the laying of corner-stones and the organizing of jubilee processions. These functions, which, although necessary, are merely pieces of empty etiquette, included a few acts which are of interest to Canadians, for the King laid the foundation stone of the House of Parliament at Ottawa and opened the great railway bridge across the St. Lawrence at Montreal.

#### THE KING'S WEALTH.

The amount of money received and spent by the heads of the nation has always excited a great deal of curiosity among those citizens whose salaries come from trade and similar sources. When the King was Prince of Wales there existed a popular impression that he might be described as poor. These rumors of his poverty probably got abroad because Parliament considered it necessary in 1889 to make him a special grant of £38,000 a year to relieve him of the anxiety of the financial welfare of his children, for it is no small task to provide for a Royal family. From the moment of his birth, King Edward was splendidly rich, as he began life with an income of £60,000 a year. This amount was not increased until his marriage at the age of 22, when Parliament gave him a wedding present of Marlborough House and of £40,000 a year. It will be seen that after 1889 he received from the country the sum of £138,000, to which might be added the money received from private sources of income, that, as all the world knows, were two in number, his estates and the turf. As Prince of Wales he won £120 per week on the race course, and his winnings for ten years represented £3,000. He also purchased Sandringham with his early savings, and this estate yielded him £7,000 a year in rentals. It will therefore be evident that the heir to the throne of England was handsomely provided for. When he became King he succeeded to a salary of

#### OVER £1,000 PER DAY.

or, to be exact, £385,000 a year. Of course, this is not the largest Royal salary in the world, but he doubtless found it ample, just as his mother managed very well on the £24,000,000, which represented the total of what she received from the British people during her long reign.

The King always enjoyed the reputation of being a generous spender. It was said that he never gave a cabby less than half a sovereign and he always dispensed his "pocket patronage" on the same ample scale. It may be of interest to know that, contrary to the general belief, he paid for his boxes in the theatres, as well as for telegrams, letters and parcels. While he was Prince of Wales, he paid the taxes on Marlborough House, even though it was the official residence of the Heir Apparent. We can get some idea of what it costs to be a king from the fact that King Edward's military wardrobe was valued at £15,000, being fully insured for that amount. Every army title possessed by the King required four complete uniforms, full-dress, undress, mess-dress and overcoat.

Royal charity also made a great demand upon his income, for it had necessarily to be very broad. Though there could be no official record to show how much he gave, it was well known that the demands for everything, from benevolent institutions to memorial funds, were incessant, for the King of England, like the Archbishop of Canterbury, was the patron saint of a hundred little world's and had to head all the subscription lists. The King was a great asset as a patron, and was therefore always in demand. It will be readily seen, that in spite of his enormous income, King Edward never had too much cash for a year's expenditure.

#### KING EDWARD'S SPEECHES

King Edward once said of himself that if brevity was the soul of wit he might claim to be the wittiest speaker in England. He summed up in that little remark his gift of an orator, for he did not indulge in speeches which were intended to be either quoted or remembered. Of course, his constitutional position was largely accountable for this attitude, for he could not reveal his secret thoughts on national issues in public. He became in time, therefore, a perfect master of the art of speaking without offending anybody, and might safely have said a great deal, like Mr. Gladstone, without revealing his real opinion.

He never did speak at length, however, for he abominated lengthy speeches and sermons, and his presence at any function always made for brevity. His attitude has been described as a practical protest against the tyranny of long speaking. His own speeches were of two kinds, the frank, honest speech of a man to men, and the formal speech which sounded like a page from an annual report. The first, of course, was his own extempore utterance, while the other was frequently prepared for a special occasion by someone who had been given the task of providing sentiments for the King to voice.

## THE S. S. LESSON

### INTERNATIONAL LESSON, JUNE 5.

#### Lesson X. Jesus Walks in the Sea, Matt. 14. 22-36. Golden Text, Matt. 14. 33.

Verse 22. He constrained the disciples to . . . go before him—This bare statement does not explain either the Lord's urgency or the apparent reluctance of the disciples. Why did he wish to be left alone till he should send the multitudes away? John alone gives the answer. He says that Jesus saw that the people "were about to come and take him by force, to make him king." They were incited to it by the miracle; for a tradition existed among them to the effect that the coming Messiah would feed them with bread from heaven as Moses had done in the wilderness. It was to shield the disciples from the vicious influences of this sincere but misdirected enthusiasm that Jesus turned

to them—Mark adds the touch, that he seemed on the point of passing them by. This, doubtless, was to call forth their cry, an acknowledgment of their need of him. He is ready to give us succor, but requires that it be asked for.

Be of good cheer . . . be not afraid—Words frequently on the lips of Jesus. The separate passages form an instructive and comforting study. There is no situation in life calling for alarm, if only he is near to help.

28. Peter—The picture is accurate as showing him to be a man of impetuosity and daring rather than of depth, with the odd but natural combination of confidence in the Master and confidence in himself. Compare the story in John 21.

If it be thou—Indicating that Peter's doubts were not all dispelled.

29. Come. And Peter went—A command from Jesus was all that he needed (compare Luke 5. 6).

Walked upon the waters to come to Jesus—The wish to do a bold thing, in order to prove his loyalty, was native to Peter. (A year later he said: "I will lay down my life for thee.") The words imply something more than a mere attempt ending in instant failure. He made actual progress.

30. When he saw the wind—His trouble began when he took his eyes off Jesus. The rest followed inevitably—first, fear, then a loss of faith, then failure. Left to his own weakness, he must have realized suddenly how presumptuous it was to attempt such an impossibility alone, and his extremity forced from his lips that last despairing cry of faith, Lord, save me, which has brought deliverance to so many men.

31. Wherefore didst thou doubt—It was his little faith, and not his brave attempt to come, that Jesus rebuked. Read Psa. 77. 19; John 15. 5; Phil. 4. 13.

32. They were gone up into the boat—With the grasp of the Master's hand Peter's faith was revived, and he was able to carry through his undertaking, probably walking on the sea with Jesus in coming to the boat.

33. Worshipped him—A favorite verb with Matthew.

Thou art the Son of God—Literally, "God's Son," the Greek not being the same as the full Messianic title, the Son of God (as in Matt. 26. 63, for example). They were thoroughly amazed, and ready to acclaim Jesus as more than human; but the full meaning of his mission had not dawned upon them even after the feeding of the multitudes. This agrees with Mark 6. 51. 52.

#### HOW HE REMEMBERED.

##### This Man Finally Discovered the Name of the Article He Wanted.

No one has yet invented a substitute for the string tied to the finger, which usually does not recall anything except that the person round whose finger it is tied has forgotten something. Even a carefully written memorandum has the disadvantage of getting itself lost when most needed. The case of the man in the following tale is amusing, if not suggestive.

The man scratched his ear thoughtfully, while the drug clerk

## YOUNG FOLKS

### A PINK SILK SASH.

Mary's pink silk sash lay spread out on her bed, and she and Constance looked at it admiringly.

"Just think, Aunt Ethel says that sash came all the way from China," said Mary.

"What's it made of?" asked Constance.

"Why, it's made of silk," replied Mary, laughingly, "just as our dresses are made of cotton."

"Well, we know what cotton is; we know that it grows in little pods on bushes, but we don't know what silk is."

"Here comes Aunt Ethel. We'll ask her," said Mary, as their aunt came into the room. "Aunt Ethel, does silk grow on bushes the way cotton does?" demanded Mary.

"Come right down-stairs into the library and I will show you some pictures of the worms that make silk," she replied.

"Worms!" exclaimed both the little girls in a horrified tone.

"Yes, indeed, nice, useful little worms," she declared. "Worms make beautiful silk, and are not happy unless they are at work."

When they reached the library, Aunt Ethel took down a small thin book and opened it. On the first page were pictures of silkworms just ready to spin their silken cocoons.

"They look like little bits of sausages with heads and legs," declared Mary. "What do they eat?"

"They eat the leaf of the mulberry. Silkworm-farmers raise this beautiful shrub for the worms, gather the mulberry leaves and shreds and cut them into tiny bits for the worms to eat. And they eat constantly, wanting more and more food, until they are ready to spin. Then they begin to mount into twigs and branches, which the silk-farmer has ready for them, and commence their cocoons. They send out a line of silk something as a spider does in starting its web; but the industrious little weaver puts out threads of so many lengths that it is often a tangled mass."

"What is a cocoon, Aunt Ethel?" asked Mary.

"The silkworm's cocoon is made as a home for the silkworm's eggs; birds build nests and silkworms spin cocoons. When they have finished, the loose silk floss is picked from the twigs and from the cocoons, and saved and manufactured like cotton, by carding and spinning."

"What becomes of the eggs?" asked Constance.

"Oh, it is not very long before the eggs hatch out into butterflies," answered Aunt Ethel, "and then the silken cocoon is ready to be wound off on little reels. The silk is like fine silken thread, and has to be handled very carefully."

"Do silkworms grow in America?" asked Mary, eagerly.

"Yes," replied her aunt, "there are silk farmers in many states, and it is work which children and elderly people find pleasure in. They gather and prepare the mulberry leaves for the silkworms to eat, take care of the worms, and gather the silk."

## On the Farm

### CHOOSING THE FAMILY COW.

In choosing the family cow one is not limited now-a-days in the matter of breed. Well-bred stock has become so general, that ordinarily one can buy at option an individual of almost any of the approved breeds; not a pedigreed animal, perhaps, unless a rather high price is paid, but a "high-grade," which means that the animal is not of registered pedigree, but is nearly enough pure-bred to be so for all practical purposes. It remains, then, to choose whether one will buy a Holstein, a Jersey, an Ayrshire, or one of any other of the breeds commonly in use.

The choice must be made in accordance with what is most wanted, whether milk or cream. If cream, the choice, most emphatically, should be a Jersey or a Guernsey. But for feeding infants, a milk a little less rich in butter fats than that given by these animals is generally better. An ideal cow for this purpose is a cross between the Jersey and Ayrshire, and this, perhaps, is as good a family cow as can be had for all the uses generally required. But it is only occasionally that a cow bred in just this way is to be found, and a cross of the Jersey or Guernsey—which are strictly butter breeds—upon any of the approved milk breeds makes an animal of very similar characteristics. The strictly milk breeds are not recommended for family cows.

The first thing to remember in choosing a cow is that the cow most feminine in appearance is the best milker. Roughly speaking, she should be shaped something like a wedge—large and well-developed behind, and small and fine in front.

She should be wide between the hips and low in the flank, with her hind quarters set a little apart, so as to give room for her udder. Her belly should be of good size, but should round outward, rather than downward, and her rump should be straight—that is, the root of her tail should be nearly on a line with her back-bone. The shoulders should be thin and, rather narrow at the top; chest deep rather than broad; neck thin, head small, but longish—clean-cut and fine in the muzzle. The horns should be small and of fine texture; and the eyes rather large, but mild and gentle, and not showing much of the white. Her skin should be soft and pliable and the finer and silkier her coat the better.

The udder should be large and well-developed, but should stay properly in its place and not sag down too low. The four teats should stand well apart from each other, forming a "square" udder; and they should be smooth and soft, free from warts or excrescences. They should also be long enough to be taken hold of by the whole hand in milking, as when they are so short as to have to be held between the thumb and two fingers, the work of milking is greatly increased.

23. Went up into the mountain apart to pray—Christ's desire for the retirement and quietness which he found in a mountain is several times referred to (Luke 6. 12; 9. 29) Matthew, Mark, and John all record it here. It was a critical hour in his ministry. Popular enthusiasm for him had reached its climax, and from now on steadily declined. Not long after it is said that "many of his disciples went back and walked no more with him." Official hostility also deepened from now on. This prayer in the mountain, therefore, is a kind of foreshadowing of the lonelier agency of the garden.

Even was come. This must be reconciled with a similar statement in verse 15, as both unquestionably refer to events in the same day. Among the Jews it was the custom to distinguish between a first and a second evening, the first corresponding to our late afternoon (Luke speaks of it as "when the day began to decline"), and the second beginning at sunset and continuing into the night. Jesus sought the solitude of the mountain, then, just as twilight was vanishing into darkness.

24. In the midst of the sea—This discredits the old attempt to explain the miracle by saying that, beaten by the heavy storm, the boat had kept close to the land, and when the disciples saw Jesus he was really not walking on the water but on the shore.

Distressed—Literally, "tormented"; Matthew says of the boat, Mark, of the disciples. The anxiety of the little band was no doubt increased by the recollection of the former storm when Jesus calmed the sea. Then it was daylight and he was with them; now it is night and he is absent.

25. The fourth watch—From 3 to 6 a.m. This is a Roman method of reckoning, adopted by the Jews some seventy-five years before this. Up to that time they divided the night into three watches, beginning with 6 p.m.

He came unto them—Why had he delayed so long? Mark declares he was watching them from the shore. He waited until they were thoroughly exhausted by their fruitless exertions, and in the direst extremity. It was the same love for his friends which prompted him to remain two days "in the place where he was" after he knew that Lazarus was sick. They must learn their lesson through struggle.

Walking upon the sea—See verse 29. 26. The disciples saw him—Mark says "they saw him," and then repeats, "They all saw him." There was no delusion of any kind. They were troubled—Though they saw plainly enough, they did not know him. God often comes to our rescue with help which we do not recognize as such. The reason they cried out for fear was, perhaps, that they thought this ghost, or apparition, was a messenger of death.

27. Straightway Jesus spake un-

disadvantage of getting itself lost when most needed. The case of the man in the following tale is amusing, if not suggestive.

The man scratched his ear thoughtfully, while the drug clerk leaned on the counter and awaited the result of his thought.

"I want ten cents' worth of—of—"

said the man. The clerk smiled.

"Can't think what it is," he asked.

"What was it for?"

"How do I know?" demanded the man. "My wife wanted it—it's a sort of powder. I know that. You couldn't tell from that, though, could you?"

The clerk smiled and shook his head, and the man's hope faded.

"It was a white sort of powder—something like—like—O dear, I'll have to go home and find out!"

In about an hour he reappeared with a triumphant smile on his face.

"Here we are," he announced.

"I wrote it down on a piece of paper—"

He rummaged through his pockets, and rummaged again, but the paper could not be found.

"Now that's funny," he announced. "Maybe I left it—" But the clerk was selling a child four cents' worth of gum-drops and did not hear.

The man sat on a soda-fountain stool and twisted himself half-round and half-back, meanwhile thinking deeply.

The drug clerk, having counted out the four cents' worth of gum-drops, joined him.

"Find it?" he inquired. The man scowled at him.

"No, I didn't find it," he said. "Give me a chance to think, please. What's this stuff you use to make bread with?"

"Soda? No! Quick yeast? Baking-powder?"

"Keep on," said the man, joyfully. "I'll think of it in a minute."

"Corn-starch? Flour? Salt?" asked the clerk.

"Borax!" shouted the man, leaping off his stool. The clerk gasped.

"They don't put borax in bread," he said. "Do you want to die?"

"I know they don't," said the man. "But they put soda in bread, and you put soda and borax in water when your feet are swollen. That's what I want. Give me ten cents' worth of borax."

#### NOT THE SAME.

"Mother," queried the pretty daughter, "did father have his salary increased when he married you?"

"No, dear," answered the mother.

"How much was he getting?"

"Only \$10 a week."

"But I suppose he had a lot of money saved up, didn't he?"

"Not a dollar; he spent his money as fast as he earned it."

"Did you get along comfortably?"

"Yes; and we were very happy."

"Well, mother, you know dear George hasn't been able to save a cent, but—"

"See here, young lady, if that poverty-stricken dude dares show his face around here again I'll get your father to kick him into the middle of next week."

It is difficult to convince the chap who has a monopoly that competition is the life of trade.

are silk farmers in many states, and it is work which children and elderly people find pleasure in. They gather and prepare the mulberry leaves for the silkworms to eat, take care of the worms, and gather the silk.

"Then we could raise silkworms, couldn't we, and make silk enough for mother's dress?" said Mary.

"Why, yes, I suppose you could," replied her aunt, "but first of all you would have to raise mulberry-trees, for the silkworms' food."

"We will ask father to set out some mulberry shrubs right off," declared Constance. "Won't the girls at school be surprised when I tell them that worms made my pink silk sash?"

"Let's go and find a nice place to set out mulberry shrubs," said Mary; and the two little girls started out into the sunny garden.—YOUTH'S COMPANION.

#### BAD TRADE PERIODS.

Pinch of Poverty and Unemployment Cause Crime.

Much light on the growth of crime in periods of bad trade is given in British criminal statistics. It is clear that there are thousands whom the pinch of poverty and unemployment drives to pilfering, but the number of habitual criminals is remarkably low.

The increase in indictable offences in 1905 was 6,735, the total being 68,116. Such a rate of increase has not been exceeded since 1861. More than half of the increase occurred in Lancashire, Durham, and the East and West Ridings; less than one-sixth of it in the London district; and nearly all the rest in the mining and manufacturing regions. It has only to be recalled that 1908 was a year of great depression, of mining, shipbuilding and cotton disputes, as well as prolonged cold and wet. The criminal authorities are driven to connect these facts.

They submit the following classification of criminals:—

1. The "habituals," who live on crime. The latest police estimate of their total number is 4,255. There are reasons for thinking that they are decreasing.

2. The ordinarily good character, who succumbs to temptation, such as the thieving servant, the shoplifter, and those guilty of embezzlement. Their number remains fairly constant. There is no good reason to suppose that the standard of honesty among respectable people is being lowered.

3. The inefficient and hangers-on to the fringe of industry, who can earn a living honestly in good times but are the first to feel the pinch of poverty and distress, and are then easily driven to crime. Their offences are small as to the extent of poverty involved; for instance, the amount of 214 larcenies in Warrington was only £389. It is notable that vagrancy increased and drunkenness diminished.

There is within the last fifty years a substantial reduction in offences against the person, showing the improvement in manners. Probably most of the crimes of passion are by the section of the people responsible for offences against property.

But the increase in the number of cases of burglary, robbery, receiving, and coining is very marked. It seems to indicate recruits from the class who in better times live honestly.

to be taken hold of by the whole hand in milking, as when they are so short as to have to be held between the thumb and two fingers, the work of milking is greatly increased.

The udder should always be free from shininess, and after being emptied of milk it should be soft, shrunken and somewhat wrinkled. Flashiness in the udder cannot be detected when it is full, and the only test is to have the cow milked. This test also shows how much milk she gives and whether she is gentle.

If the cow has any habit—such as breaking out of her pasture or, worst of all, self-milking—it can rarely be discovered on such first examination as the purchaser can give, even if he is very careful; but it is sure to show itself later. So in this matter he must trust the seller and take his chance. But the chance, after all, is not a very long one for the overwhelming majority of cows are free from these habits, and if she is gentle to milk and handle there is usually little to fear.

A great many new owners of cows are disappointed at first in the amount of milk obtained. This is because the cow is always uneasy and homesick in a new place, and she must become thoroughly wonted to her surroundings before she will do her best at the pail. This is a matter not infrequently of a week or more.

This homesickness cannot be avoided, but it can be shortened, and some of the uneasiness of the cow averted by attending very carefully to her wants and rendering her, if possible, more comfortable than in the place she came from.

#### POULTRY NOTES.

Begin with good stock, whether of eggs or fowls.

Young turkeys should never be allowed to get wet.

Best breeds do not insure most profits without proper treatment.

Empty all water receptacles at night so as to start with fresh water in the morning.

Food may be wasted by giving too much as well as too little.

Soft slushy food is often a prime factor in bringing on the gapes in young chickens.

Never use for breeders fowls which are or have been seriously afflicted with any disease.

The greater number of eggs the hens lay, the cheaper the cost of production in proportion.

Allow no decomposing vegetable matter to accumulate around the house or yards.

The hens cannot make eggs or properly digest their food without plenty of good water.

Thin egg shells are pretty good indication that the ration given the hens lacks mineral matter.

Ducks hatch well in incubators and are easily raised in brooders if they are not crowded.

Do not open the doors of the incubators more than once or twice a day when the eggs commence to hatch.

The only advantage in grinding food for poultry is that it affords a better opportunity for making up a complete ration.

When chickens are fed and cared for, just to keep them at a standstill, the food given is actually thrown away.

# VAGARIES OF "NERVES"

## CONCLUSIONS OF A PSYCHOLOGICAL STUDY.

### Paradoxes of Human Apprehensions—Curious Fears Which Affect Us:

You need not feel ashamed if your knees tremble and your cheeks pale whenever you glance down from the top of a high tower or other lofty place. You are simply suffering from aerophobia, a disease to which even the bravest souls are subject.

The various kinds of human fears have recently been taken up by psychologists and scientists and some very interesting conclusions have been recorded.

The fact that a woman is afraid of a mouse is no indication, it appears, that she is a physical coward. The man who faints at the sight of blood may be a veritable Coeur de Lion in moments of real danger. Fear is a disease, which may be either local or general. The coward suffers from general fear, whereas even the bravest man may suffer from the same disease in a local form and evince fear at perfectly harmless things.

The sailor who never bats an eye in the severest hurricane very often shows symptoms of the greatest distress at the rocking of a railway train. On the other hand, the engineer who handles the throttle of a fast express locomotive, maintaining a speed of over sixty miles an hour, turns deathly sick from the motion of a rowboat.

### LOOKING FOR REMEDY.

These peculiar conditions are now being studied by the medical profession with a view to remedying them. There is no reason why any one should feel afraid of standing upon a platform which he knows is perfectly safe, even though it is several hundred feet in the air, nor why a bridge worker, who is accustomed to scaling lofty girders like a monkey should become panic-stricken when asked to handle a dozen needles, and the psychologists are going to try to find a remedy.

The fear of sharp points, which is called aichmophobia, is by no means uncommon, and yet so far has been unaccounted for. The fear of darkness from which nearly all children suffer until they are old enough to reason is more easily explained.

### PRIMITIVE INSTINCT.

It goes back to the very beginnings of the human race, when primitive man was always in danger from the wild animals which might attack him under the cover of darkness. Even when our early ancestors acquired the art of fire-building, the horrors of darkness were by no means diminished. On the contrary, in some respects, they were increased, because it was found that the glare of the bonfires attracted the prowling creatures of the night and the man on watch had to be constantly on the alert for the green eye-balls of unwelcome visitors. This fear of darkness is therefore bred into our children.

# LESS THE LIGHTNING

## STE OF POTENTIAL ENERGY OF GREAT VALUE.

### What the Flash Could do if It Were Directed Toward Some Useful Work.

Modern physical scientists are ever looking for new worlds to conquer. Having already harnessed the streams and even converted wave force into electricity, they are now giving exhaustive study to the question of the possible utilization for industrial purposes of the power in the lightning's flash. To every intelligent electrician the play of lightning seems a great waste of energy. An electrical storm possesses enough potential energy to drive a good many factory wheels. A lightning flash several miles in length casts athwart the earth an illumination so great and intense that our highest developed electrical lamps seem insignificant indeed, in comparison.

Recently, a brilliant electric flash on a cloudy day was estimated to give light to one foot candle power, and if one watt be allowed per candle foot, then a flash of lightning a space of two miles would represent an expended energy of some 10,000 kilowatt seconds. One's imagination is staggered by the idea of an artificial lamp capable of spreading an illumination like this through space! The flash through space illuminates two miles square of earth, which would require many hundred thousand incandescent lamps to equal.

That we have entertained many misconceptions about lightning is apparent from recent investigations. A lightning flash frequently extends over

### SEVERAL MILES OF SPACE.

A single flash of 10,000 volts an inch would thus require a potential difference of about 1,200,000,000 volts for the entire length of two miles. Such a voltage in the clouds is almost inconceivable. It is not in accord with all of the most advanced ideas as to the nature of electricity. It should, so far as we can conceive, annihilate whole communities and destroy all human life within a radius of many miles of the flash.

But this does not happen. Ever since man has inhabited the earth violent thunderstorms and electrical flashes have broken the monotony of summer heat, and so far as the records show no remarkable visitation of unusual calamity has resulted therefrom. Yet the phenomena of the lightning flash have puzzled scientists. They could not understand why ozone and nitric acid were not formed in enormous quantities by even an ordinary flash.

But the secret of it now appears to be that our eyes are not capable of recording accurately the peculiar phenomenon of the heavens. As a matter of fact, the lightning flash, so to speak, is an optical illusion. It is not one violent discharge, but a series of discharges. A flash of two or more miles in length is made up of 30 to 50

### SUCCESSIVE DISCHARGES.

what the flash of lightning could do if properly harnessed and its potential energy stored so that it could be used for driving machinery. Its usefulness would be limited only by the machinery invented for doing man's work, and this, as we all know, is sufficiently varied to include almost every known labor.

### PERSONAL POINTERS.

#### Gossip About Some of the World's Prominent People.

Prince Nicholas of Montenegro, is the most picturesque of living sovereigns. Keen on the preservation of national characteristics, his apparel is gorgeous. He wears a white surcoat, over which is a sleeveless jacket of black silk stiffly embroidered with gold; a scarlet undercoat covers his broad chest, also rich in gold-work; a multi-colored sash holds the inevitable revolver, and wide trousers are gathered at the knee into a pair of patent leather boots.

Herr Bebel, the leader of the German Socialists, who recently celebrated his seventieth birthday, is a wheelwright by trade. Although entirely self-educated, he is one of the finest orators and debaters in the Fatherland; and whenever he addresses the Reichstag he is certain of having a large and attentive audience. In such esteem is he held by the Socialists that millions will obey his will because they have implicit trust in his integrity. Herr Bebel neither drinks nor smokes, and, besides being a celebrity in the political world, has gained fame as a writer.

The Duke of Connaught possesses a unique collection of pipes. On one occasion an American billionaire asked him to do him the honor of presenting him with one of his treasures. If such a favor were conferred upon him, he added, he would never smoke another pipe till the day of his death. The Duke was a little amused, but he gave the pipe. Some time after His Royal Highness again met the American, who assured him that his pipe was the sweetest he had ever smoked. "I'm awfully pleased to hear that," replied the Duke, "because I found, after I had given you the pipe, it was not one of mine at all."

One of the largest coal-owners in England is the Marquess of Londonderry, who has been disputing a statement made by the Chancellor of the Exchequer about the profits of coal-mining. Practically the whole of his huge income is derived from coal. As a landowner he draws royalties and wayleaves, and as railway shareholder he takes his percentage of the cost of sending the coal from the mines. Much of the product of his seams is brought to London in ships owned by himself, to be discharged at wharves which are his own property, and from there to be distributed in carts which bear his coronet. As a matter of fact, there is no profit in the business of marketing coal of which he does not obtain a share.

There is not the slightest loss of girlishness in Queen Alexandra's figure. Walking with the dowager empress of Russia, she appears as youthful as a schoolgirl. Her step is light, her carriage erect and her

creatures of the night and the man on watch had to be constantly on the alert for the green eye-balls of unwelcome visitors. This fear of darkness is therefore bred in bone and children should fully and kindly wear

#### AGAROP

Closely allied to agoraphobia, the which is also of the same origin as the dates back to the same source, is the more or less of the same nature, and the same would fall a natural enemy of the character of the same nature, and the same across them.

#### CA.

Alloraphobia, or the is far more common, and are various phases of it. Some people cannot tolerate a cat in the same room. Others do not mind the feline's presence, but cannot endure its touch. While others, who will fearlessly fondle poor pussy in their arms, will go well-nigh into hysterics if the animal should suddenly and without warning spring into their laps.

#### SIGHT OF BLOOD.

Hematophobia, or the fear of blood, is perhaps the most common fear among persons otherwise courageous. Big, lusty policemen have been known to faint at the mere sight of the blood oozing from the scratch which the physician makes in the course of vaccination. There is no pain whatever attached to the operation, and yet the sight of the blood is enough to overwhelm these otherwise brave guardians of the peace.

Strangely enough, too, persons who can stand all sorts of pain themselves readily succumb at the sight of suffering in others.

#### FEAR OF DEAD.

"One of my patients," said a well-known physician, "has submitted to several serious operations without an anaesthetic and has behaved splendidly throughout, although the blood flowed in streams and considerable pain must have been occasioned. And yet this same patient, a woman, fell in a faint the other day when she saw a boy holding a bloody towel to his nose."

or the fear of the more or less nature of the feels a certain at the sight of affects some of the, un-

conclusion. It is not one violent discharge, but a series of discharges. A flash of two or more miles in length is made up of 30 to 50

#### SUCCESSIVE DISCHARGES.

occurring so rapidly that their appearance seems almost simultaneous to the eye. This has been proven by the camera, which measures light much more accurately and sensitively than the human eye, upon which an impression persists for only 0.1 second, and which cannot measure anything less than this.

This being the case, a lightning of several miles in length may occur without creating any great potential difference in the ends. The action of a discharge is much like a landslide down a steep sand hill. A slight movement of a pebble may start several other particles downward until the movement becomes general, and a landslide follows. A slight discharge of electricity from a cloud is followed by another and another until

the difference between the potential points of the cloud of 50,000,000 volts.

Sensitive recording instruments have begun to measure the lightning flashes, and in this way our knowledge concerning the electrical discharge of the clouds is being made more accurate. For instance, it is pretty well known now that the duration of the discharge is about one five hundred thousandths of a second, a duration that is utterly incomprehensible to the human mind.

#### THE AVERAGE ENERGY

of the discharge at 10,000 kilowatt seconds would be equal to 7,000,000 foot pounds expressed in simple language.

We accept this potential energy of a flash of lightning, consisting as it is of a series of almost simultaneous discharges, we might translate it into even plainer language by showing what it could be directed toward some practical work. In electrical science experts speak of the kilowatt hour instead of the kilowatt second. It is known approximately what can be accomplished by a kilowatt hour when electricity is used to perform different kinds of work on this basis.

There is no doubt that the figure of girlishness in Queen Alexandra's figure. Walking with the dowager empress of Russia, she appears as youthful as a schoolgirl. Her step is light, her carriage erect and her form is lithe and graceful. In the preservation of youth she far surpasses Bernhardt, looked upon in this respect the world over as a wonderful example of physical youth carried into old age. Alexandra's face is without a line. Her cheeks are rounded and almost plump. Her chin is as smooth as if she were 16. She attributes her perfection of complexion to a cold cream, the preparation of which is carefully kept secret. Many times she has been inclined to give the preparation to the women of the fashionable world, but so far she has contented herself with doling out only enough for a few intimate women friends.

The only Royal doctor in the world is Duke Karl Theodore of Bavaria, who is celebrating his seventeenth birthday. He was intended for the army, but being fascinated by the study of medicine he abandoned military life for the hospital ward. He devoted himself particularly to studying diseases of the eye, and soon became one of the most successful oculists of the day. About two years ago he performed, with the assistance of his wife, his five-thousandth operation for cataract. The Duke makes no charge for attending poor people, and only asks payment from those who can easily afford it. His fame has spread all over Europe, and the demands for his assistance are so numerous that he has been obliged to erect a large hospital at Tegernsee, where he visits patients.

#### QUEEN'S GEMS "PASTE."

Queen Never Wore Cullinan Diamond Lest She Lose It.

The Tower of London is undergoing extensive alterations. The crown jewels, notwithstanding rumors to the contrary, repose in a dungeon under the old foundations of Wakefield Tower, near the Dark-stone stairway, which leads to the secret chamber where prisoners were left to die in the middle ages.

The Bank of England, however, shelters the famous Cullinan diamonds, which the Queen supposedly wears on great occasions. The fact is the Queen has never worn the jewel. The great diamond is now resting on her State couch.

The Queen is the real one for wearing it.

When the Wakefield Tower is again opened to visitors the model of the Cullinan will once more gleam on its velvet cushion. The queen's favorite gems are amethysts and pearls.

#### TO PURIFY WATER.

In cases where it is impossible to obtain a filter, water may be purified by adding to it powdered alum in the proportion of one tablespoonful to four gallons of water. Stir quickly and allow it to stand. All that is impure will then sink to the bottom, and the pure water on the top may be poured off for use.

Of course, there is no limit to

## NEW HOUSES IN BERLIN

THEY ARE NOW BUILT WITH ALL THE COMFORTS.

German City Now Offers Every Luxury and Convenience in Them.

"With all the comfort of the day" is the announcement invariably made, on the advertisement boards of every newly-built house in Berlin, and the house or flat as invariably bears out the promise. Indeed, in nothing has Berlin so much changed as in this matter of "comfort."

Time was when the word had something peculiarly English about it and conveyed to the German mind a suggestion of unnecessary luxury bordering on sybaritism. Except in Berlin proper, the very centre of the city, the suggestion has completely passed away, and no house or flat outside of a mile radius from the Kaiser's palace would now obtain a tenant if it had not the comforts demanded as quite ordinary in America and to some extent in Great Britain.

### MANY CONVENIENCES.

How many elements go to make up this comfort may be known by an enumeration of the conveniences with which all new Berlin houses are supplied. Central heating, warm water supply, elevator, large and technically perfect bathroom, gas cooking stove and electric lighting are installations that go without saying, but in not a few of the newest buildings are now added motor garage, vacuum cleaning, thief-proof safe, photographic dark room, and even a roof garden, with sun bath. The last comforts are only offered with flats of from ten to fifteen rooms, but the modern Berlin flat of from five to seven or eight rooms is pretty certain to have its vacuum cleaner and iron safe.

### "ZIMMER" UNKNOWN.

In the new houses the old Berliner zimmer is unknown—that vast and sombre chamber leading to the kitchen and back premises and only dimly lighted at one end, where a solitary window opened on an equally dim and dismal court yard. One German characteristic, however, even the newest flats retain. As many rooms as possible are made to communicate with each other by doors and thus afford the opportunity of conveniently entertaining a numerous company of guests.

### LAWSUIT OVER MILLINERY.

English Judge Poses as Critic of Women's Styles.

There is nothing new in dress-makers having trouble collecting their bills, but in Old London just now there is an epidemic of that sort. One was a case tried before the West London County Court in which a lady sued a firm of dress-makers for the value of a costume which she alleged had not been made in accordance with her instructions.

The judge requested a lady to don the costume, and this having

## IN CASE OF DREAD FIRE

WAYS IT MAY HAPPEN AND HOW TO ACT WHEN IT DOES

Extinguishing a Starting Fire—Be Sure to Keep all Doors Closed.

Attics and closets are the breeding places of many fires. An attic is generally the asylum for all sorts of inflammable material, and as it never is properly ventilated it becomes a fire incubator when the summer sun strikes the roof.

Among the odds and ends that make up the contents of the average attic are old varnished furniture, dry as tinder, rags, many of them greasy and ripe for spontaneous combustion, painting oils, liable to take fire when the sun beats on the roof; broken toys and old clothes, the pockets of which may contain matches. Attics and garrets often have a temperature of 1.0 degrees Fahrenheit, which is the ignition point for matches.

Floor sweepings under furniture or in a closet are liable to take fire spontaneously or from a flying match head. Sawdust used in sweeping floors, if left in a corner where there is no current of air to carry off the heat it generates, is very likely to become hot enough to ignite itself.

### DANGEROUS PREPARATION.

A preparation advertised for sweeping carpets is composed of sawdust, sand and a mineral oil to give it color, together with tincture of benzine to give it odor, according to Good Housekeeping. Fires have frequently started spontaneously from heaps of this material. Greasy overalls kept in a tight wardrobe have been known to ignite.

The most dangerous closet is that under a stairway, because inflammable materials may hide there and if a fire starts in it the best avenue of escape from upper stories is cut off.

Furnace ashes in the cellar have in them so much fine coal and litter that they are liable to spontaneous combustion if an open window permits them to get wet by a rain storm. The fine coal from the winter's supply may ignite if wet.

Playing with fire and matches by children is a prolific source of fires in residences.

One's ability to extinguish a starting fire depends upon intelligence and self-control. If the blaze is just starting throw water on the burning material,

### NOT ON THE BLAZE.

One bucket of water will do more good if thrown on by handfuls or with a broom than dashed on at once. A small fire may be smothered with a rug or blanket, or beaten out with a wet broom.

If you cannot put out the fire in a minute then give an alarm at once. Do not leave a door open when you run out to give an alarm. If the doors and windows are closed when a fire starts you may be able to get the firemen there in time to put it out while it is in only one room. The fire soon consumes all the oxygen in a closed room and may die out if it gets no fresh air.

## GROWTH OF BY-PRODUCTS

ELEMENTS LOST IN THE RESIDUES OF FACTORIES.

Millions of Dollars Worth of Material Has Been Allowed to Escape.

The complete utilization of all residues in industrial processes, so that there shall be no waste at all, is a commercial idea. Formerly no effort at all was made to go any farther in any process of manufacture than to turn out the product directly aimed at, all incidental or by products being thrown away. At present the secondary product assumes greater importance than the primary, but there is still much to be done before all waste is abolished. A recent address by Otto Witt, a celebrated German chemist, is thus paraphrased and commented upon in *La Nature*, Paris:

"It is easy to see that simply to do away with or remove an annoying accumulation of material is an appreciable advantage, but very often these residues are injurious, and by utilizing them we render unnecessary costly treatment imposed upon the manufacturer by the sanitary authorities—for example, purification residual water, or the suppression of smoke. Finally, the use of these materials gives them a certain value that may sometimes be very appreciable."

### MUCH LOST.

"We do not generally realize, in fact, what a total may be obtained by the value of the useful elements lost too often in the residues of factories. The powerful modern industries have a very intensive production, and the smallest figure is so greatly multiplied that it changes into millions."

Interesting facts on this subject have been published recently by Mr. J. Effront, director of the Institute of Fermentation at Brussels, and Mr. A. Aulard, the well-known sugar chemist. The figures relate to the value of principles contained in the residues of sugar-making and distilling which are theoretically utilizable, but in most cases practically unutilized.

### SOME BIG ITEMS.

First mentioned among these residues is the "mash" from which spirituous liquors are distilled. This contains salts of potash and soda and various nitrogenous compounds. Sometimes the potash is saved by evaporation and calcination, but generally the whole mash is thrown away, and in any case all the nitrogen is lost.

In grain distillation about a pound of nitrogen is thus thrown away for every ten gallons of alcohol produced. It has been calculated that the equivalent of 100,000 tons of ammonium sulphate, worth about \$4,000,000, is thus annually lost in Europe. Instead of using this as a fertilizer, Chili saltpetre is imported at great expense.

Processes for saving this valuable nitrogenous fertilizer have been devised and are beginning to be used. In the beet-sugar industry, likewise, juice is thrown away containing various albuminoids and hydrocarbons, besides considerable

## MUSK OXEN SAVED LIVES

COMMANDER PEARY'S STORY OF HUNT FOR FRESH MEAT.

Herd Was Found on Nares Island Which Saved 1906 Party From Starvation.

The latest instalment of Peary's story of his journey to the Pole deals with the hunting, by means of which the party's stock of provisions for the Winter was very materially helped out. At first the game was so scarce that he was a good deal worried.

Only a few hare and foxes were secured, and he began to fear that he himself on his latest previous expedition had killed off the musk ox, upon which Arctic explorers have largely depended for fresh meat. But he had better luck when with three Eskimos he made a week's trip to explore Clarence Markham Inlet.

"On the next march," he writes in *Hampton's*, "we had gone only some six or seven miles when, rounding a point on the eastern shore of the inlet, Oob-loo-yah and I at the same moment saw black dots on

### A DISTANT HILLSIDE.

"Oomingmksue!" said Oob-loo-yah excitedly, and I nodded to him well pleased.

"To the experienced hunter with one or two dogs seeing musk oxen should be the same as securing them. There may be traveling over the roughest kind of rough country, with wind in the face and cold in the blood, but the end should always be the trophies of hides, horns and juicy meat."

"For myself I never associate the idea of sport with musk oxen—too often in the years gone by the sighting of those black forms has meant to me the difference between death and life. In 1899 in Independence Bay the finding of a herd of musk oxen saved the lives of my entire party. On my way back from 87 degrees 6 minutes in 1906 if I had not found musk oxen on Nares Land the bones of my party would now be lying up there in the great white waste."

"When Oob-loo-yah and I saw the significant black dots in the distance we headed for them. There were five close together and another a little way off. When we got within less than a mile two of

### THE DOGS WERE LOOSED.

They were wild with excitement, for they also had seen the black dots and knew what they meant, and as soon as the traces were unfastened they were off—straight as the flight of a bee.

"We followed at our leisure, knowing that when we arrived the herd would be rounded up ready for our rifles. A single musk ox when he sees the dogs will make for the nearest cliff and get his back against it, but a herd of them will round up in the middle of a plain, with tails together and heads toward the enemy; then the bull leader of the herd will take his place outside the round-up and charge the dogs. When the leader is shot another takes his place, and so on.

of the West London County Court in which a lady sued a firm of dress-makers for the value of a costume which she alleged had not been made in accordance with her instructions.

The judge requested a lady to don the costume, and this having been done, called the plaintiff on to the bench and made a critical examination of the costume. The plaintiff said that the skirt was decidedly too tight.

The solicitor—"I think it is the fashion just now for them to be tight."

His Honor—"Some ladies I had before me last week complained that their skirts were so tight that they could not walk in them, while one of them went so far as to say that she could not sit down in hers." (Laughter.)

The plaintiff next pointed out that the sleeves of her dress were too short.

The defendant's solicitor—"I am instructed that they are the fashionable cut, your Honor."

His Honor—"I don't think they are right."

Ultimately judgment was given in favor of the plaintiff.

### HOW LONG IS A DAY?

If you meet a man, and he casually remarked that he ate 315 meals yesterday you would either be amazed at his appetite, or take him for a hardened romanticist. But probably the man may be from Spitzbergen, where they have a day three and a half months in length. And on the whole it would be wise if one should undertake to do certain work to receive so much a day in payment, to understand just where the work is to be done, or one might have to labor 18½ hours at Stockholm, if it happened to be the longest day of the year, or all the time from May 21st to July 22nd if in some parts of Norway. In St. Petersburg, the longest day is 19 hours, and the shortest 5 hours. In Finland there is a 22-hour day. In London and at Bremen the longest day is 16½ hours; at Hamburg and Dantzic 17 hours, and at Washington about 15 hours.

### SMALLEST HUMAN RACE.

The inhabitants of the Andaman Islands are the smallest race of known human beings—that is, taken on an average. The height of a full-grown Andaman islander seldom exceeds three and a half feet. A few weigh over sixty-five pounds. They are said to be marvellously swift of foot, as well as being possessed with extraordinary endurance. The few travellers who visit the islands avoid contact with the dwarfs as far as possible, partially on account of their extreme filthiness, but principally because of their warlike disposition and their handiness with poisoned spears.

### MONEY IN LINING.

An eccentric old man died at Runcorn, England, the other day. He had worked at the Runcorn docks for 50 years, lived alone, and had always appeared in poor circumstances. On his death-bed, however, he asked that his working waistcoat should be given to his brother. On examination, it was found that a hundred sovereigns had been sewn in the lining.

If the doors and windows are closed when a fire starts you may be able to get the firemen there in time to put it out while it is in only one room. The fire soon consumes all the oxygen in a closed room and may die out if it gets no fresh air.

After the firemen are called work at getting out the things you want most to save. Don't throw the clock from the window and then carry out your clothing, as some persons have done.

If awakened in the night by the smell of fire don't dress. Wrap yourself in a blanket or quilt from the bed and get out the quickest way you can. Shut the doors you pass through. After calling help look in and see where and

### WHAT IS THE DANGER.

If the fire is on the first floor it is very dangerous to go above, because heat and smoke ascend.

One can often get out through a hall filled with smoke by going on hands and knees when one would fall choking if one ran. The smoke is thickest at the ceiling. Holding a wet towel or anything made of wool, or even a coat collar over the mouth greatly lessens the danger of injury to the lungs or death from the carbonic acid gas in the smoke.

If a man is in a burning building with no fire escape and the stair below is burning or the hall filled with smoke, he should shut the door and transom to keep out the gases. Then he should throw open the window to get cool air and to let the firemen and neighbors see where he is, so that they may bring a ladder to the window.

### WHERE DIVORCE IS EASY.

Though one marriage out of three in Japan ends in a divorce, the lower class is, to an overwhelming degree, responsible for this state of affairs. In the upper a man only divorces his wife after relatives and family councils have done their best to avert the catastrophe. In the lower class it is different. A man marries lightly, and divorces lightly, and women not infrequently divorce their husbands—a thing unheard of among the gentler folk. The woman of the people, being accustomed to live by her own labor, has only the loss of her children to consider. In Japan the father has always the custody, because heredity is only supposed to be transmitted through males. The wife has to salute her husband first on every occasion. She waits, sits, eats, sleeps, all after him, and addresses him as "danna sama," or "my lord."

"Gee! I wouldn't want to have to bite that man!"—Life.

Processes for saving this valuable nitrogenous fertilizer have been devised and are beginning to be used. In the beet-sugar industry, likewise, juice is thrown away containing various albuminoids and hydrocarbons, besides considerable waste sugar.

In Europe alone, more than 50,000,000 tons of beet sugar are made annually, and this manufacture involves a loss of \$12,000,000 worth of nutritious substances. Some of these also are shortly to be recovered and used.

### UP THE CHIMNEY.

"It would be easy to multiply examples. Prof. F. Fischer of Göttingen, for instance, estimates at \$70,000,000 the annual saving in Germany from the rational utilization of the heat produced in the furnaces of steam boilers. In recent work on 'Industrial Combustion,' the value of the easily-usable heat that passes up factory chimneys and is wasted is estimated at \$20,000,000."

### FREEDOM IN CHINA.

#### Imperial Decree will Emancipate Millions of Slaves.

The Chinese Government by imperial rescript has abolished slavery throughout the empire and has prohibited henceforth the purchase and sale of human beings under any pretext. The reform, however, is not altogether complete, as by the rescript certain forms of slavery will still be tolerated. In a report made to the State Department it is stated that the retainers of Manchu princes are not emancipated, but it is forbidden to call them slaves. They have long enjoyed educational and other privileges, although still bound to their hereditary masters.

The household slaves of the Manchus are also not emancipated; but their status under the law is improved. They are to be regarded as hired servants, but their service is due for an unlimited term of years, so that they are in reality perpetual slaves. Under this rescript the immemorial practice of selling children in China in times of famine is abolished, although they may be bound for a specified term, but never beyond the age of twenty-five.

The rescript is said to be a compromise measure, but it will eventually give freedom to millions of human beings, and is declared to mark a distinct advance in civilization.

### STEEL BARRELS.

Not all barrels are made of wood; there are barrels made of metal. A steel barrel that comes from Germany, used in the importation of aniline dye in powder form, is made with a flat band of the metal, perhaps eight inches in width, around the middle, at the bulge of the barrel, while the two ends of the barrel, tapering from the middle section to the heads, in the ordinary barrel fashion, are made of corrugated steel with the corrugations running lengthwise. The dye stuff is heavy, 600 or 700 pounds to the barrel; but the steel barrel remains rigid and carries its heavy load securely without racking or twisting.

plain, with tails together, and heads toward the enemy; then the bull leader of the herd will take his place outside the round-up and charge the dogs. When the leader is shot another takes his place, and so on.

"A few minutes later I stood again, as I had stood on previous expeditions, with that bunch of shaggy black forms, gleaming eyes and pointed horns before me—only this time it did not mean life or death.

Yet as I raised my rifle again I felt clutching at my heart that terrible sensation of my aim again in my bones I felt that

### GNAWING HUNGER

of the past, that savage lust for red, warm dripping meat—the feeling that the wolf has when he pulls down his quarry. He who has ever been really hungry, either in the Arctic or elsewhere, will know what I mean. Sometimes the memory of it rushes over me in unexpected places. I have felt it after a hearty dinner, in the streets of a great city when a lean-faced beggar has held out his hand for alms.

"I pulled the trigger and the bull leader of the herd fell on his haunches. I had found the vulnerable spot under the shoulder, where one should always shoot a musk ox. To aim at the head is a waste of ammunition. As the bull went down out from the herd came a cow, and I also brought her down with one shot. The others, a second cow and two yearlings, were the work of a few minutes."

### NO TANGLING.

Walter was an important witness, and one of the lawyers, after cross-examining him severely, said:

"Your father has been talking to you and telling you how to testify, has he?"

"Yes," said the boy.

"Now," said the lawyer, "just tell us how your father told you to testify."

"Well," said the boy modestly, "father told me that the lawyers would try and tangle me, but if I would just be careful and tell the truth I could tell the same thing every time."

The lawyer didn't try to tangle that boy any more.

### BODIES IN WRONG COFFINS.

By mistake at an undertaker's establishment in Birmingham, England, the bodies of two men, removed from the workhouse infirmary, were placed in coffins bearing the wrong nameplates, and conveyed to the homes of the wrong relatives. The son of one of the dead men complained to the infirmary authorities that the body taken to his house was not that of his father, and then it was discovered that a mistake had been made. One of the widows was so distressed that she had to be medically treated.

### DRIVEN TO DRINK.

Bad cooking is blamed by Dr. Pockock, rector of a Manchester, (England) college for the fact that many men take to drink. He says it is more important to teach girls how to cook than how to play the piano nicely. Many men are gradually led towards drink by bad cooking and want of variety in their food-stuffs.

## Summer Underwear

We keep the best makes in Balbriggan, Natural Wool, Merino and Cotton.

Artex Cellular for the man who likes the high grade.

We are Headquarters for Underwear.

## A.E. Lazier.

Mr. W. J. Jewell has secured the contract for the alterations to the new Merchants' Bank building, corner of Dundas and John streets. The front and east side will be of roman stone with stone cornice. The whole interior will be stripped and rebuilt both downstairs and on the second floor, and elegant up-to-date bank fittings installed. The front of Mrs. Dosee's store will also be changed.

The action of the town council on Monday evening in putting into motion the machinery for the putting in of a trunk sewer, which will eventually form a basis for a systematic plan of sewerage for the town is to be commended. Had this plan of action been taken some years ago the town would have been farther advanced to-day, so far as the sewerage of the town is concerned. Once the trunk sewer is constructed, all sections of sewers put in afterwards can be made to conform with a general plan, and in time the town will have a complete system. It is safe to predict that when the by-law to raise the necessary funds for the proposed trunk sewer is submitted to the property holders for their assent it will receive a good majority.

**Coming with a Rush.**

Anticipate your wants, warm weather is sure to be here, provide yourself with a hammock. Good assortment at **BOYLE & SON'S,**

**Monuments.**

All who intend purchasing a monument or tablet, posts, &c. would do well to call and get our prices before leaving their order elsewhere. First class materials and workmanship guaranteed.

Your patronage solicited

**C. J. PAPINEAU.**

Works opposite Gibbard's new ware rooms.

**50c Chocolates for 29c at Wallace's Drug Store.**

Beginning next Saturday we will sell 1b boxes of Saturday chocolates at 29c or 30c on any other day at Wallace's Drug Store. Positively no exception to this as it is simply the manufacturer's mode of introduction.

**Meetings**

Will be held at the Town Hall, Adolphustown, as follows: Friday and Saturday 10th and 11th June—Reading Meeting, 10:30 a.m.; Lecture, 3 p.m.; Gospel Preaching 7:30 p.m. Sunday, 12th June—Lecture 3 p.m.; Gospel Preaching, 7:30 p.m. Monday

## TRINITY METHODIST CHURCH

Sunday, June 5th, 1910.

agious. Itch on human or animal cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by—T. B. Wallace

Jas. Gordon expects to start next week on his regular trips through the country. He will usually be at his old stand, on Wallace's corner, on Saturday afternoons.

A. S. Kimmery has full stock of choice alfalfa, red clover, timothy seed, and Manchuria barley. I pay 19c for eggs. 19 lbs granulated sugar \$1. Five Roses Flour has no equal; good flour \$2.00. 8 lbs sulphur 25c.

On Sunday afternoon a party of five boys, three Collegiate boys and two bunkers were enjoying themselves in canoes on the river, the occupants of one canoe upset and one of the boys in the other canoe followed their example and also took a cold bath so that within an hour three out of five members of the party got a ducking.

A fine large barn is being erected on the Campbell House hotel property. Joy and Son have the contract for the mason work. The building is being constructed of cement blocks and will be 100 feet long by 34 feet wide, with 14 feet walls. The contractors expect to have the walls up and ready for the carpenters to go to work putting on the roof by the first of next week. Mr. John Wagar has the contract for the carpentering work. The flooring will be of cement and the building will be shingled with Pedlar galvanized shingles sold by Potter and Blanchard.

The death occurred on Friday, May 20th, of one of Amherst Island's highly respected farmers, in the person of Rodan Burleigh, of Emerald. The late Mr. Burleigh had been a sufferer for over three years with gangrene in his feet. He was a Presbyterian in religion and also a member of Bath lodge, A. F. & A. M. and the Prentice Boys, and Orangemen. His father, the late Robert Burleigh, was the founder of Burleigh L.O.L., No. 482. Deceased is survived by his wife, one sister and two brothers, Mrs. Hugh Strain, and Alfred Burleigh, Chatham, and Arwed, of this place. The largely-attended funeral was held on Sunday to Pentleton cemetery, and was conducted by Rev. James Cumberland. The Orangemen and Prentice Boys attended in a body.

Saturday evenings fine view of that elusive object, Halley's comet, has dispelled from the minds of many the doubt which had begun to exist as to whether the comet was a fact, or only a myth. About nine o'clock the much heralded visitor could be seen distinctly in the Western sky, and nearly everybody was gazing skyward. When it became evident that the sky would be cloudless, an event which had not occurred since May 19th, nearly everyone was on the lookout for the visitor, and a good many people sought the darkest streets and alleys in order to get a better view, while those who had not ventured into the business section hustled out into their back yards in order to view the heavenly wonder. It is safe to say that nearly every man, woman and child in Napanee had a peep at the comet on Saturday evening. It will still be visible, weather permitting, until about June 10th, when it will pass beyond our vision for another seventy-five years, and not many who saw it Saturday evening will see it when it returns.

Feed ground for 6 cents per hundred at the big mill.

J. R. Dafee wishes to notify his customers and the public generally that the price for grinding feed at the big mill for the present and until further notice will be six cents per hundred pounds with one pound per hundred off for waste. The mill is equipped with two of the best grinding machines known to the trade with a capacity of twenty-five tons per day, feed ground as fine as desired and ready when you call for it.

Your patronage solicited, J. R. DAFE.

## Meetings

Will be held at the Town Hall, Adolphustown, as follows: Friday and Saturday 10th and 11th June—Reading Meeting, 10:30 a.m.; Lecture, 3 p.m.; Gospel Preaching 7:30 p.m. Sunday, 12th June—Lecture 3 p.m.; Gospel Preaching, 7:30 p.m. Monday 13th June—Reading Meeting 10:30 a.m.; Lecture 3 p.m.; Gospel Preaching 7:30 p.m. All are cordially invited to these meetings.

## Methodist Conference.

### Halley's Comet.

On Saturday night Halley's Comet was distinctly seen by every one who cared to look. Many Napanee astronomers had looked in vain for this erratic visitor until that time. No one looked in vain for Paul's wall paper bargains. They are here every day.

### The Hook in His Back.

A young angler in making a cast had the misfortune to catch the hook in the back of his coat, and, try as he would, he was quite unable to reach it. He called for help, but no one came to his assistance, and, annoyed that his afternoon's fishing should be spoiled, he picked up his rod and trudged two miles downstream before he met a laborer.

"Here, my good man," said the perspiring fisher, "just take this hook out of my back, will you? I've been walking for miles trying to get some one to pull out the thing."

"Bless me, sir!" said the astonished rustic. "Why didn't yer take off yer coat?"—London Graphic.

### Slept Through Fire.

There was an exciting incident in a Glasgow house one night lately, where George Ward was alone and had fallen asleep in a chair in front of the fire. Shortly afterwards a man who was passing the house felt a strong smell of burning, and looking through the window he noticed Ward lying on the floor with his clothing on fire. The man forced open the window, dragged Ward outside, and threw water over him. He died later in hospital.

### The Longest Rivers.

The following are the lengths of some of the world's longest rivers: Mississippi, 4,194 miles; Nile, 3,670 miles; Amazon, 3,300 miles; Ob, 3,235 miles; Yangtsekiang, 3,000 miles; La Plata, 2,950 miles; Lena, 2,860 miles; Kongo, 2,800 miles; Amur, 2,700 miles; Mekong, 2,600 miles; Niger, 2,600 miles; Yenisei, 2,500 miles; Volga, 2,325 miles; Hwangho, 2,300 miles; Yukon, 2,050 miles.

### Lend Your Name.

CHAS. P. STEIN.

Denbigh, May 21st, 1910.

Butter 15c per lb., if you use the Little Butter Making Machine, shown by Boyle & Son. One pound butter, one pint good milk, makes two lbs. Butter in 10 minutes, simple and easy to work. See it at

BOYLE & SON'S.

### Fertilizer.

I have a lot of Commercial fertilizer for sale, opposite the Campbell House, Napanee. Every farmer and gardener should secure a small quantity and give it a trial. This fertilizer will double the product of every acre of land when properly applied. Call and see it, it is suitable for hay, grain, oat crops, berries, lawns, cemetery plots &c. It will show improvement six hours after application.

W. A. ROSE.

### Annual Meeting.

The annual meeting of Lennox Farmers' Institute will be held in Town Hall, Napanee on Thursday, June 9th, 1910, at 1.30 o'clock, p. m. for the Election of Officers and other general business. Wm. H. Day, B. A., Prof. of Physics, of the Ontario Agricultural College, will give an address on the "Benefits of Underdraining." Also a practical demonstration of the best methods employed in taking the levels, determining grades, etc. Persons interested in drainage should hear Prof. Day, as he is an authority on this subject. A full attendance is requested. All are welcome.

D. AYLSWORTH, Bath, President.

T. B. LUND, Napanee, Vice-Pres.

B. A. ROBLIN, Adolphustown, Sec.

### Worms in children often cause convulsions.

"Rexall worm syrup" acts on all kinds of worms, a few doses never fail to dislodge the enemy. Besides being a safe and sure remedy in cases where worms are present or suspected this syrup may be used occasionally as an aperient for children. Sold in Napanee only at Wallace's Red Cross Drug Store. Price 25 cents.
